NATIONAL TRANSPORTATION SAFETY BOARD

Notice To Reinstate a Previously Approved Information Collection; Comment Request

AGENCY: National Transportation Safety Board (NTSB).

ACTION: Notice to reinstate a previously approved information collection for review and comment.

SUMMARY: In compliance with the Paperwork Reduction Act, this notice announces the NTSB is submitting an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB) for renewal of a previously approved information collection, NTSB Form 6120.1. This ICR is the second notice, as required by OMB regulations concerning approvals of information collections. This notice again describes the nature of the information collection and its expected burden; in addition,

this notice describes some changes and additions the NTSB has made to Form 6120.1 after receiving feedback from the general aviation community.

DATES: Submit written comments regarding this proposed collection of information by December 19, 2013.

ADDRESSES: Interested members of the public may submit written comments on the collection of information to the OMB Desk Officer for the NTSB at Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, Fax: 202-395-5806 (this is not a toll-free number), email: *OIRA_submission@omb.eop.gov*. Commenters are encouraged, but not required, to send a courtesy copy of any comments to the National Transportation Safety Board, ATTN: Office of Research and Engineering, 490 L'Enfant Plaza East SW., Washington, DC 20594.

FOR FURTHER INFORMATION CONTACT: Loren Groff, NTSB Office of Research and Engineering, at (202) 314-6517.

SUPPLEMENTARY INFORMATION: The NTSB announces the proposed extension of a public information collection and seeks public comment on the collection in accordance with the Paperwork Reduction Act. The NTSB's collection of information on Form 6120.1 is necessary to fulfill the NTSB's statutory mandate to investigate transportation accidents, because the form requests information concerning aviation accidents and incidents. This Notice informs the public that it may submit comments concerning the proposed use of this form to the OMB Desk Officer who oversees NTSB information collections. This renewal request is not associated with a rulemaking activity.

Paperwork Reduction Act Requirement

In accordance with OMB regulations that require this Notice for proposed ICRs, the NTSB herein notifies the public that it may submit comments on this proposed renewal of information collection. Title 5 CFR 1320.5(a)(1)(iv) requires an agency to publish in the **Federal Register** a notice soliciting comments regarding the proposed information collection. The notice must describe the information collection, the necessity for the collection, and the estimated burden the submission of information will impose on respondents. This notice must advise the public that it may submit comments directly to OMB. In accordance with these regulations, the NTSB now advises the public, via this notice, that it may submit comments directly to OMB concerning the NTSB's renewal of the information collected on NTSB Form 6120.1.

Prior to soliciting comments directed to OMB, the applicable regulations require an agency to first publish in the **Federal Register** a notice describing the information collection, and requesting the public submit comments directly to the agency. 5 CFR 1320.8(d). The NTSB published such notice on May 7, 2013. 78 FR 26659.

Public Input Regarding NTSB Form 6120.1

The NTSB did not receive any written comments concerning the proposed renewal of the information collection. However, the NTSB held what it has termed a "listening session" to obtain feedback from the general aviation (GA) community concerning NTSB investigations. The majority of NTSB aviation investigations concern GA accidents or incidents, and with recent advances in technology, the NTSB seeks to ensure it is collecting the most accurate and important information and data to ensure appropriate findings of probable cause.

In furtherance of this goal, the NTSB met with a group of 28 people who participated in the NTSB's GA listening session on April 3, 2013. These owners, operators, and other members of the GA community (such as safety researchers, educators, owner and builder associations, and manufacturers) provided input that prompted the NTSB to include a question on the form asking what "additional equipment" the aircraft contained, within the aircraft information category. In addition, the NTSB considered this feedback and now proposes updates to the form to include additional options for answers to some of the questions on the form. These changes are explained more fully below.

Description of NTSB Form 6120.1

The Pilot/Operator Aircraft Accident/Incident Report Form is used in determining the facts, conditions, and circumstances for aircraft accident prevention activities and for statistical purposes. In furtherance of its goal to ensure the form is updated and includes information that will assist the NTSB in investigating accidents and incidents, the NTSB recently determined it should replace some questions and reorganize the form. These changes will ensure the form solicits information concerning the latest technologies about which the NTSB will need information. In addition, some questions on the form will now solicit more specific information.

The majority of the form's contents remains unchanged; the form is still divided into 17 categories, which are titled as follows: Basic information;
