Overview of This Information Collection

(1) *Type of information collection:* Revision of a previously approved collection.

(2) *The title of the Form/Collection:* Firearm Inquiry Statistics (FIST) Program

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Not applicable.

(4) *Affected public who will be asked to respond, as well as a brief abstract:* Primary: State and local agencies. State and local agencies responsible for maintaining records on the number of

background checks for firearm transfers or permits that were issued, processed, tracked, or conducted during the calendar year are asked to provide information about: The number of applications and denials for firearm transfers received or tracked by the agency; reasons why an application was denied; information on arrests that occurred when a denied person who submitted a false application or had an outstanding warrant was arrested by the checking agency or another agency that was notified (state agency responders only); appeals to an agency and court for reconsideration of a denial (state agency responders only); and reversals of a denial decision (state agency responders only). Through its Firearm Inquiry Statistics Program, the Bureau of Justice Statistics collects information on firearm background checks conducted by state and local agencies and combines this information with the Federal Bureau of Investigation's National Instant Criminal Background Check System transaction data to produce a national estimate of the number of applications received and denied and of the reasons for denial. The information is also combined with data obtained from the Bureau of Alcohol, Tobacco, Firearms, and Explosives on appeals of denied applications and arrests for falsified documents. The Bureau of Justice Statistics uses this information in published reports and in responding to queries from the U.S. Congress, Executive Office of the President, state officials, researchers, students, the media, the general public, and others interested in criminal justices statistics.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 761 responses at 25 minutes each. Respondents have the option to provide responses using either paper or web-based questionnaires. The burden estimate is based on the results of the field test of the 2012 Firearm Inquiry Statistics Program survey instrument and feedback received from the 2012 data collection, as well as the Bureau of Justice Statistics' extensive history conducting the FIST data collection.

(6) *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 317 annual total burden hours associated with the collection.
