

will help FSA review potential alternatives to, and environmental impacts expected to result from, proposed changes to CRP. The results of the 2014 CRP SPEIS and subsequent ROD will be used in implementing and modifying CRP administration and will also serve as guidance to FSA decision-makers when considering proposed CRP changes.

The SPEIS process provides a means for the public, other agencies, and Tribes to provide input on program implementation alternatives and their impacts, and other environmental concerns. We encourage you to participate in helping to define the scope of the draft 2014 CRP SPEIS.

Summary Description of Preliminary Alternatives

To initiate the process, FSA has developed a set of preliminary alternatives to be studied and impacts to be analyzed in the draft 2014 CRP SPEIS. At this time, FSA is proposing three alternatives (the No Action alternative and two action alternatives). The No Action alternative (continuation of CRP as it is currently administered and analyzed in the 2010 CRP SEIS) will be evaluated as required by the Council on Environmental Quality (CEQ) regulations (40 CFR parts 1500–1508).

FSA expects legislative changes to CRP in the next Farm Bill (or other relevant legislation). Although the timing of the next legislative change to CRP is uncertain, to be able to implement the changes expeditiously, FSA is getting a start on the analysis of potential changes by including potential legislative changes in the alternatives. As a starting point for the required NEPA analysis that will be required before FSA can implement regulatory changes when the Farm Bill is enacted, FSA determined that using the proposals most recently passed by the House and the Senate, respectively, was reasonable. Because those proposals may change, it did not seem prudent to detail those proposed changes in this notice; the alternatives will be revised as needed in response to legislation and public and other input. To see the details that FSA is working from, refer to www.CRPSPEIS.com for the text of the House and Senate proposals used as our starting point. At this point, the two separate CRP proposals, however they are eventually modified, will be the foundation for our proposed federal actions, and are therefore included as separate alternatives. They are similar, but have some differences, and as discussed below, are not the sole components of the action alternatives.

When the next Farm Bill is enacted (or any other legislative change to CRP), the resulting legislative changes to CRP will be used along with the public and other input to this NOI to fully articulate the alternatives and their impacts, which will be fully described in the resulting scoping report.

FSA has developed the two action alternatives that include the provisions from each of the respective proposed legislative changes to CRP, as well as the following discretionary considerations, to ensure that the 2014 CRP SPEIS captures the full range of potential alternatives, impacts, and issues anticipated: Administrative, staffing, and budgetary considerations; efficiency and jurisdiction concerns; and other factors. The alternatives and impacts will be amended, as appropriate, based on input from the public, other agencies, and Tribes during the scoping process, as well as by any legislative changes to CRP.

Both of the two action alternatives include a gradual reduction of the CRP enrollment cap by 20 to 25 percent over the next 5 years. In the 2014 CRP SPEIS, FSA will analyze discretionary measures to meet the proposed mandatory reduction in enrollment while maintaining the maximum environmental benefit realized from the program.

Other discretionary provisions, which FSA identified separately from any pending legislative changes, to be addressed in the 2014 CRP SPEIS include:

- Changing the enrollment cap on the Farmable Wetlands Program;
- Reducing incentive and cost-share payments for tree thinning activities;
- Evaluating other forms or processes for enrollment under continuous sign-up;
- Adding flexibility for haying and grazing, including emergency haying and grazing on otherwise ineligible CRP CPs (as addressed in the 2012 CRP PEA and FONSI); and
- Providing transition options for expiring contracts to enroll in other conservation programs.

Signed on November 21, 2013.

Candace Thompson,

Acting Executive Vice President, Commodity Credit Corporation, and Acting Administrator, Farm Service Agency.
