DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Safe Drinking Water Act

On November 23, 2013 the Department of Justice lodged a proposed Consent Decree ("Decree") with the United States District Court for the District of Wyoming in the lawsuit entitled *United States v. Bryan Pownall*, Civil Action No. 13-CV-142-F. The action concerns the public water system the defendant, Bryan Pownall ("Defendant") uses to provide water to the Bryan's Place bar and a few trailer homes located in Rozet, Campbell County, Wyoming, about 16 miles east of Gillette, Wyoming. The Decree resolves the claims alleged in the United States' Complaint that Defendant failed to comply with routine monitoring, reporting, and other requirements of the Safe Drinking Water Act and the National Primary Drinking Water Regulations ("NPDWRs"), two administrative compliance orders issued by EPA on May 20, 2010 and July 24, 2011, and a final order issued by EPA on November 7, 2011 resolving an administrative complaint against Defendant. The Decree requires Defendant comply with a list of specific regulatory requirements for a period of four years, subject to an early termination provision. The Decree provides that if Defendant connects the Bryan's Place public water system to a new regional water system extended from Gillette, Wyoming to Rozet, Wyoming, and provides proof to EPA that Defendant is obtaining water from

the new regional water system, the Decree can then be terminated.

The publication of this notice opens a period for public comment. SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The collections of information contained in the Logging Operations Standard are necessary to reduce workers' risk of death or serious injury by requiring employers to assure that operating and maintenance instructions are available on machines or in the area where the machine is operated. For vehicles, employers must assure that operating and maintenance instructions are available for each vehicle.

Maintenance and Operating Instructions (§§ 1910.266(f)(1)(iii) and (g)(3))

Under paragraph (f)(1)(iii) and (g)(3) of the Standard, employers must assure that operating and maintenance instructions are available on machines or in the area where the machine is being operated, and in vehicles. For those machines with no operating instructions in the cab, the employer will be required to obtain and retain a manual within the immediate work area for each machine. Since the Logging Operations final rule has been in effect since 1995, OSHA assumes that all employers are in compliance with the provision to have operating and maintenance instructions available on

machines or in the area where the machines are being operated.

Certification of Training (§ 1910.266(i)(10)(i) and (i)(10)(ii))

Paragraph (i)(10)(i) requires employers to certify in writing that a worker/supervisor received the training the Standard requires. Under paragraph (i)(10)(ii), employers need only maintain the most recent certification for training that a worker/supervisor has received.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and cost) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply, for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Action

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Logging Operations Standard (29 CFR 1910.266). OSHA is proposing to decrease the burden hours in its currently approved information collection request from 25,957 burden hours to 1,622 burden hours (a total decrease of 24,335 hours). This decrease is due to updated data showing a decrease in the number of establishments affected by the Standard as well as the removal of burden hours associated with the requirement that employers provide training to workers. Upon further analysis, this provision is not considered to be a collection of information under PRA-95. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Logging Operations Standard (29 CFR 1910.266).

OMB Control Number: 1218-0198.

Affected Public: Business or other for-profits.

Number of Respondents: 8,286.

Number of Responses: 50,904.

Frequency of Responses: On occasion.

Estimated Total Burden Hours: 1,622 hours.

Estimated Cost (Operation and Maintenance): \$0.
