Petition For Exemption

Docket No.: FAA–2013–0795.

Petitioner: Cirrus Design Corporation.

Section of 14 CFR Affected: 14 CFR 23.177(b).

Description of Relief Sought: Petitioner requests relief from static directional and lateral stability requirements for its Cirrus model SR20 aircraft. The aircraft were manufactured with a wing design that required a rudder aileron interconnect (RAI) to comply with requirements of section 23.177(b); however, flight tests with use of a roll trim system in lieu of the RAI show a level of safety at least equal to the intent of the static lateral stability requirements of that section.
