

necessary to issue an Order to Show Cause because the permittee has voluntarily consented to this channel change.

The document also solicits comment on whether Stations WMOM(FM) and WMLQ(FM) would seek reimbursement for application costs in implementing these channel changes in the event that we delete Channel 274A at Evert and, if so, whether these expenses are reimbursable and by whom. Conversely, if we retain Channel 274A at Evert, the document solicits comment on whether the holder of the Ludington construction permit would consent to reimburse Station WMLQ(FM) for the costs of its channel change because the Ludington permittee would not have to wait for the auctioning of the Evert allotment in order to commence operations at Ludington.

Finally, the proposed reference coordinates for Channel 274A at Penwater are 43–52–10 NL and 86–21–32 WL. With respect to Ludington, a staff engineering analysis reveals that the transmitter site specified in the construction permit for Channel 249A at Ludington is not fully spaced if we substitute Channel 242A. We have identified an alternate site for Channel 242A at Ludington that is fully spaced at reference coordinates 43–54–30 NL and 86–26–10 WL. The proposed reference coordinates for Channel 249A at Manistee are 44–14–07 NL and 86–19–05 WL.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding. Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.
