SUPPLEMENTARY INFORMATION:

Background

The Hanford site, located in southeastern Washington State along the Columbia River, is approximately 586 square miles in size. Hanford's mission from the early 1940s to approximately 1989 included defense-related nuclear research, development, and weapons production activities. These activities created a wide variety of chemical and radioactive wastes. Hanford's mission now is focused on the cleanup and remediation of those wastes and ultimate closure of the site. An
