SUPPLEMENTARY INFORMATION: This ICR seeks to maintain PRA authority for the information collections specified in regulations 29 CFR 1910.1020 and -.1048. The Formaldehyde Standard requires a covered employer to monitor worker exposure, to notify workers of their formaldehyde exposures, to provide medical surveillances, to provide examining physicians with specific information, to ensure workers receive a copy of their medical examination results, to maintain

workers' exposure monitoring and medical records for specific periods, and to provide the OSHA, National Institute for Occupational Safety and Health, affected workers, and their authorized representatives access to these records. Employers, workers, physicians, and the Government use these records to ensure exposure to benzene in the workplace does not harm workers. The Occupational Safety and Health Act authorizes this information collection. See 29 U.S.C. 651, 655, and 657.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0145.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on December 31, 2013. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on August 23, 2013 (78 FR 52567).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within 30 days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1218-0145. The OMB is particularly interested in comments that:

including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and

BILLING CODE 4510-26-P

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Notice of Action

AGENCY: Bureau of Labor Statistics, Labor.

ACTION: Notice of action.

SUMMARY: Effective with the release of PPI data for January 2014 in February 2014, BLS will transition from the Stage of Processing (SOP) aggregation system to the Final Demand-Intermediate Demand (FD-ID) aggregation system. This shift will result in significant changes to the PPI news release, as well as other documents available from PPI, including the PPI Detailed Report and PPI Handbook of Methods.

DATES: The transition to the FD-ID system will occur with the release of January 2014 data, scheduled for release Wednesday, February 19, 2014.

FOR FURTHER INFORMATION CONTACT: Jonathan Weinhagen, Producer Price Index, Bureau of Labor Statistics, telephone number 202-691-7709 (this is not a toll-free number), or by email to: weinhagen.jonathan@bls.gov.

SUPPLEMENTARY INFORMATION: To expand the scope of coverage for the Producer

Price Index (PPI), the Bureau of Labor Statistics (BLS) has developed an aggregation system that includes price changes for domestic goods, services, and construction sold to final demand and intermediate demand.

The transition to the FD-ID system is the culmination of a long-standing PPI objective to improve the SOP aggregation system by incorporating PPIs for services, construction, government purchases, and exports. In comparison to the SOP system, the FD-ID system more than doubles current PPI coverage of the United States economy in its primary aggregate indexes to over 75 percent of in-scope domestic production. The FD-ID system was introduced as a set of experimental indexes in January 2011. Nearly all new FD-ID goods, services, and construction indexes provide historical data back to either November 2009 or April 2010, while the indexes for goods that correspond with the historical SOP indexes go back to the 1970s or earlier.

To assist with the transition to the FD-ID system, PPI has been providing a version of the PPI news release based on the FD-ID model, starting with the publication of July 2013 data in August 2013. This document will be labeled "Experimental" through the December release in January 2014 and is being posted to the PPI Experimental FD-ID Aggregation System Web page (<http://www.bls.gov/ppi/experimentalaggregation.htm>) about two weeks after each month's regular PPI release. That Web page also contains detailed methodological information for the FD-ID aggregation system.

With the publication of January 2014 data in February 2014, the FD-ID version of the PPI news release will become the official news release document of record.

A **Federal Register** Notice requesting comments pertaining to the FD-ID aggregation system was posted in the **Federal Register** Tuesday, May 17, 2011. **Federal Register** Volume 76, Number 95 (Tuesday, May 17, 2011), [Notices], [Pages 28467-28469], [FR Doc No: 2011-12042.]

The FD-ID system will highlight the index for final demand, which measures price changes for goods, services, and construction sold to final demand: personal consumption, capital investment, government purchases, and exports. The composition of products in the final demand price index differs from that of the finished goods index in two major respects. First, it includes government purchases and exports. Second, it includes services and construction, which are not reflected in finished goods.
