

Preliminary Determination and Suspension of Liquidation

We preliminarily determine the countervailable subsidy rates to be:

Company	Subsidy rate (percent)
Mangal Steel Enterprises Ltd. ("Mangal")	8.13
Babu Exports ("Babu")	38.98
All Others	8.13

In accordance with sections 703(d)(1)(B) and (2) of the Act, we are directing U.S. Customs and Border Protection to suspend liquidation of all entries of steel threaded rod from India that are entered, or withdrawn from warehouse, for consumption on or after the date of the publication of this notice in the **Federal Register**, and to require a cash deposit for such entries of the merchandise in the amounts indicated above.

Disclosure and Public Comment

The Department intends to disclose to interested parties the calculations performed in connection with this preliminary determination within five days of public announcement of this determination.⁷ Interested parties may submit case and rebuttal briefs.⁸ For a schedule of the deadlines for filing case briefs, rebuttal briefs, and hearing request, see the Preliminary Determination Memorandum.

This determination is issued and published pursuant to sections 703(f) and 777(i) of the Act.

Dated: December 11, 2013.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix 1

Scope of the Investigation

The merchandise covered by this investigation is steel threaded rod. Steel threaded rod is certain threaded rod, bar, or studs, of carbon quality steel, having a solid, circular cross section, of any diameter, in any straight length, that have been forged, turned, cold-drawn, cold-rolled, machine straightened, or otherwise cold-finished, and into which threaded grooves have been applied. In addition, the steel threaded rod, bar, or studs subject to this investigation are nonheaded and threaded along greater than 25 percent of their total length. A variety of finishes or coatings, such as plain oil finish as a temporary rust protectant, zinc coating (*i.e.*, galvanized, whether by electroplating or hot-dipping), paint, and other similar finishes and coatings, may be applied to the merchandise.

Included in the scope of this investigation are steel threaded rod, bar, or studs, in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 1.80 percent of manganese, or
- 1.50 percent of silicon, or
- 1.00 percent of copper, or
- 0.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 1.25 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.012 percent of boron, or
- 0.10 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.41 percent of titanium, or
- 0.15 percent of vanadium, or
- 0.15 percent of zirconium.

Steel threaded rod is currently classifiable under subheadings 7318.15.5051, 7318.15.5056, 7318.15.5090 and 7318.15.2095 of the Harmonized Tariff Schedule of the United States ("HTSUS"). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise is dispositive.

Excluded from the scope of this investigation are: (a) Threaded rod, bar, or studs which are threaded only on one or both ends and the threading covers 25 percent or less of the total length; and (b) threaded rod, bar, or studs made to American Society for Testing and Materials ("ASTM") A193 Grade B7, ASTM A193 Grade B7M, ASTM A193 Grade B16, and ASTM A320 Grade L7.

DEPARTMENT OF COMMERCE

International Trade Administration

Limitation of Duty-Free Imports of Apparel Articles Assembled in Haiti Under the Haitian Hemispheric Opportunity Through Partnership for Encouragement Act (HOPE)

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notification of Annual Quantitative Limit on Certain Apparel under HOPE.

DATES: *Effective Date:* December 20, 2013.

FOR FURTHER INFORMATION CONTACT: Maria Dybczak, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-3651.

SUPPLEMENTARY INFORMATION:

Authority: The Caribbean Basin Recovery Act ("CBERA"), as amended by the Haitian Hemispheric Opportunity Through Partnership for Encouragement Act of 2006 ("HOPE"), Title V of the Tax Relief and Health Care Act of 2006 and the Food, Conservation, and Energy Act of 2008 ("HOPE II"); the Haiti Economic Lift Program Act of 2010 ("HELP"); and implemented by Presidential Proclamations No. 8114, 72 FR 13655, 13659 (March 22, 2007), and No. 8596, 75 FR 68,153 (November 4, 2010).

HOPE provides for duty-free treatment for certain apparel articles imported directly from Haiti. Section 213A(b)(1)(B) of HOPE outlines the requirements for certain apparel articles to qualify for duty-free treatment under a "value-added" program. In order to qualify for duty-free treatment, apparel articles must be wholly assembled, or knit-to-shape, in Haiti from any combination of fabrics, fabric components, components knit-to-shape, and yarns, as long as the sum of the cost or value of materials produced in Haiti or one or more countries, as described in HOPE, or any combination thereof, plus the direct costs of processing operations performed in Haiti or one or more countries, as described in HOPE, or any combination thereof, is not less than an applicable percentage of the declared customs value of such apparel articles. Pursuant to HELP, the applicable percentage for the period December 20, 2013 through December 19, 2014, is 50 percent or more.

For every twelve month period following the effective date of HOPE, duty-free treatment under the value-added program is subject to a quantitative limitation. HOPE provides that the quantitative limitation will be recalculated for each subsequent 12-month period. Section 213A(b)(1)(C) of HOPE, as amended by HOPE II and HELP, requires that, for the twelve-month period beginning on December 20, 2013, the quantitative limitation for qualifying apparel imported from Haiti under the value-added program will be an amount equivalent to 1.25 percent of the aggregate square meter equivalent of all apparel articles imported into the United States in the most recent 12-month period for which data are

⁷ See 19 CFR 351.224(b).

⁸ See 19 CFR 351.309.

available. The aggregate square meters equivalent of all apparel articles imported into the United States is derived from the set of Harmonized System lines listed in the Annex to the World Trade Organization Agreement on Textiles and Clothing ("ATC"), and the conversion factors for units of measure into square meter equivalents used by the United States in implementing the ATC. For purposes of this notice, the most recent 12-month period for which data are available as of December 20, 2013 is the 12-month period ending on October 31, 2013.

Therefore, for the one-year period beginning on December 20, 2013 and extending through December 19, 2014, the quantity of imports eligible for preferential treatment under the value-added program is 322,629,971 square meters equivalent. Apparel articles entered in excess of these quantities will be subject to otherwise applicable tariffs.

Dated: December 11, 2013.

Janet E. Heinzen,

Acting, Deputy Assistant Secretary for Textiles, Consumer Goods and Materials.

Secretarial Infrastructure Business Development Mission to the United Arab Emirates, the Kingdom of Saudi Arabia and Qatar

March 8–14, 2014.

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice.

Mission Description

The United States Secretary of Commerce will lead an Infrastructure Business Development Mission to the United Arab Emirates, the Kingdom of Saudi Arabia and Qatar from March 8–14, 2014. This business development mission will promote U.S. exports to the Gulf region by helping U.S. companies launch or increase their business in the infrastructure sector. The mission will include government and business-to-business meetings, market briefings and networking events. In all three countries, the governments and private sector are investing significant money in infrastructure projects. As a result, the mission will focus on export-ready U.S. firms with product and services in a broad range of leading U.S. infrastructure sectors with an emphasis on project management and engineering (including construction, architecture and design), renewable energy (solar, wind, waste-to-energy), smart grid and energy efficiency, and environmental technologies (including water/wastewater; air pollution control; and waste management).

The mission will stop in the United Arab Emirates, the Kingdom of Saudi Arabia and Qatar. In each country, participants will meet with pre-screened potential agents, distributors, and representatives, as well as other business partners and government officials. They will also attend market briefings by U.S. Embassy officials, as

well as networking events offering further opportunities to speak with local business and industry decision-makers.

The delegation will be composed of representatives from 20–25 U.S. firms in the mission's target sectors. Representatives of the Export-Import Bank of the United States (Ex-Im) and the Overseas Private Investment Corporation (OPIC) will be invited to participate to provide information and counseling regarding their suite of programs, services, and interests in the Middle East.

Commercial Setting

The United Arab Emirates

The US-UAE trade relationship is undergoing a period of rapid expansion as the UAE seeks to undertake major investment in its infrastructure and transport systems. U.S. exports to the UAE totaled almost \$23 billion in 2012. U.S. exports to the UAE increased by 36% in 2011, 42% in 2012 and are poised to grow an additional 15% in 2013. Key market opportunities for U.S. firms will continue to be present in project management and design work on urban transport, rail, oil & gas and power generation (including alternative energy). Demand for imports is being fueled by economic growth rates of 3–4%, and bolstered by strong oil revenues as the UAE implements a one-third increase in its petroleum production.

In addition to accounting for virtually all UAE oil production and defense sector acquisitions, the Emirate of Abu Dhabi is also moving forward to develop a \$10 billion urban transit system, a national railroad network and a nuclear energy industry. Dubai continues to expand its role as the major regional trade hub and has begun development of one of the world's largest new airport projects. On November 27, 2013, the Emirate won the award to host the 2020 World Expo which will result in the undertaking of major infrastructure and hospitality development.

Specific projects in these sectors include an urban transit project in Abu Dhabi (light rail and below ground subway); development of the Etihad Rail network to link the UAE's major ports and cities; development of Dubai's new Al Maktoum airport and adjacent logistics, commercial, residential and recreational sites; and the anticipated design and construction of over 100 new hotels and multiple venues for the 2020 World Expo with an estimated project value of \$40 billion.

Additionally, there are many major clean energy opportunities for U.S. firms. Dubai plans to develop a 1,000
