Department of the Army; Corps of Engineers

Notice of Availability of the Draft Environmental Impact Statement (DEIS) for the Installation of a Terminal Groin Structure at the Western End of South Beach, Bald Head Island, Adjacent to the Federal Wilmington Harbor Channel of the Cape Fear River (Brunswick County, North Carolina)

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of availability.

SUMMARY: The U.S. Army Corps of Engineers (USACE), Wilmington District, Wilmington Regulatory Field Office, has received a request for Department of the Army authorization, pursuant to Section 404 of the Clean Water Act and Section 10 of the Rivers and Harbor Act, from the Village of Bald Head Island (VBHI) to develop and implement a shoreline protection plan that includes the installation of a terminal groin structure on the east side of the Wilmington Harbor Bald Head Shoal Entrance Channel (a federally-maintained navigation channel of the Cape Fear River) at the "Point" of Bald Head Island.

DATES: A public hearing for the Draft Environmental Impact Statement (DEIS) will be held at the International Longshoreman's Association Hall, located at 211 West 10th Street in Southport, Brunswick County, North

Carolina, on February 12, 2014, at 6:00 p.m. Written comments on the DEIS will be received until February 24, 2014.

ADDRESSES: Copies of comments and questions regarding scoping of the DEIS may be submitted to: U.S. Army Corps of Engineers (Corps), Wilmington District, Regulatory Division. Attn: File Number SAW-2012-00040, 69 Darlington Avenue, Wilmington, North Carolina 28403.

FOR FURTHER INFORMATION CONTACT:

Questions about the proposed action and DEIS can be directed to Mr. Ronnie Smith, Wilmington Regulatory Field Office, telephone number: (910) 251-4829. A copy of the DEIS can be found at the following link: <http://www.saw.usace.army.mil/Missions/RegulatoryPermitProgram/PublicNotices.aspx> under the VBHI Terminal Groin Project.

SUPPLEMENTARY INFORMATION:

1. *Project Description.* The west end of South Beach, Bald Head Island, Brunswick County, North Carolina, has experienced both chronic and short-term shoreline erosion. This erosion has resulted in direct impacts to nearby beaches and dunes and could potentially impact public infrastructure and homes. This area has been subject to past sand placement activities sponsored by both the VBHI and the Corps. The Corps has placed several million cubic yards of suitable material on this shoreline since 1991 as part of a Federal navigation project. To address its erosion issue, the VBHI desires to implement a long-term beach and dune stabilization strategy to include installation of a single terminal groin at the western end of South Beach. The proposed terminal groin would be expected to perform the following functions: (1) Reduce inlet-directed sand losses from beach fill projects; and (2) stabilize shoreline alignment along the westernmost segment of South Beach in such a manner that alongshore transport rates are reduced. The terminal groin would serve as a "template" for fill material placed eastward (of the proposed terminal groin). The proposed groin has been designed as a "leaky" structure (*i.e.* semi-permeable) so as to provide for some level of sand transport to West Beach (located northward and downdrift of the proposed groin).

2. *Issues.* There are several potential environmental and public interest issues that are addressed in the DEIS. Additional issues may be identified during the public review process. Issues initially identified as potentially significant include:
