SUPPLEMENTARY INFORMATION:

Purpose and Need for Action

The purpose of this project is to reauthorize livestock grazing in a manner that maintains and/or moves the area toward Forest Plan objectives and desired conditions. The previous AMPs were completed in 1992. Since that time, the following have occurred: The Forest Plan was revised in 2003; Term Grazing Permits were modified with the Forest Plan Grazing Management riparian and upland forage utilization standards in 2005; and Lower Portneuf Watershed Analysis (LPWA) was completed and included revised management recommendations as well as identified areas not meeting Forest Plan Desired Condition in 2010. There is a need for change from the current management as the allotments are not meeting or moving toward desired conditions in an acceptable timeframe. Specific desired conditions that are not being met include: riparian conditions,

and water resource and quality, and recreation.

Proposed Action

The proposed action would reauthorize livestock grazing within the project area and would implement a grazing management strategy that would result in improvement of riparian, water quality, and aquatic resources, and reduces the recreation conflict. The allotment management plan outlines livestock management objectives, practices (including maximum amount of use to meet management objectives), structural and non-structural improvement necessary to meet management objectives, and a monitoring plan to determine whether management objectives are being met and adaptive management actions employed. The proposed actions includes direction for livestock grazing in riparian areas using the Caribou Riparian Grazing Implementation Guide (i.e. site-specific riparian grazing management standards); adjusted structural range improvements (i.e. fences and water development) to reduce the impacts to riparian areas and disperse recreation management prescription; and defines the adaptive management strategies to meet management objectives and practices.

Possible Alternatives

In addition to the proposed action, the no graze alternative was also identified to be analyzed in the environment analysis. "No grazing" means that the Forest Service would not reauthorize livestock grazing within the project area (FSH 2209.13-92.31). Permitted livestock grazing would be eliminated on the Pocatello, Midnight, and Michaud Allotments. The livestock grazing permits would be cancelled. In accordance with agency regulations (36 CFR 222.4), grazing would cease two years after the notice of cancellation. Current livestock management would continue during that two-year interval.

Responsible Official

The Westside District Ranger, Jeffery Hammes, will be the responsible official for making the decision and providing direction for the analysis.

Nature of Decision To Be Made

The responsible official will decide whether or not to re authorize livestock grazing within the Pocatello, Midnight,
