BILLING CODE P**NUCLEAR REGULATORY COMMISSION**

[Docket No. NRC-2014-0013]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of pending NRC action to submit an information collection request to the Office of Management and Budget (OMB) and solicitation of public comment.

SUMMARY: The U. S. Nuclear Regulatory Commission (NRC) invites public comment about our intention to request the OMB's approval for a new information collection that is summarized below. We are required to publish this notice in the **Federal Register** under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* Evaluation of Outreach Efforts Related to the NRC's Safety Culture Policy Statement.
2. *Current OMB approval number:* 3150-XXXX.
3. *How often the collection is required:* One time.
4. *Who is required or asked to report:* Respondents asked to voluntarily

participate in this information collection activity will include licensees of the NRC's Office of Federal and State Materials and Environment Management Programs, fuel cycle, transportation and storage, and greater than critical mass licensees overseen by the NRC's Office of Nuclear Materials Safety and Safeguards, and materials licensees of the following Agreement States that have expressed interest in participating: Illinois, Minnesota, North Carolina, Ohio, Rhode Island, Virginia, Washington, and Wisconsin.

5. *The number of annual respondents:* 6,158 licensees of the NRC and participating Agreement States will be invited to participate in this one-time, voluntary information collection activity. The staff anticipates a response rate of 50 percent; therefore, the expected number of respondents is 3,079. Because the survey will only be administered once during the three year clearance period, the annualized number of respondents is 1,026.3 respondents.

6. *The number of hours needed annually to complete the requirement or request:* The survey is estimated to take no more than 20 minutes (0.33 hours) per respondent. The total annualized burden is estimated to be 338.7 hours.

7. *Abstract:* In June 2011, the NRC issued its Safety Culture Policy Statement, which describes the Commission's expectation that the NRC's regulated community maintain a positive safety culture. The NRC continues to seek ways to engage with stakeholders, licensees, members of the public, and the international community to provide outreach and education on the Safety Culture Policy Statement. The purpose of the current information collection activity is to gather feedback on whether NRC's outreach and communication activities have been effective in promoting awareness of the Safety Culture Policy Statement, and to determine if changes to current activities and/or new activities are necessary and appropriate. To support this evaluation, the NRC staff plans to conduct a voluntary survey of its materials regulated community, specifically materials users, organizations involved in the fuel cycle, and storage and transportation of nuclear materials. The NRC staff has also invited Agreement States (i.e., States that have signed formal agreements with the NRC to assume regulatory responsibility over certain byproduct and source nuclear materials, as well as small quantities of special nuclear materials) to participate by voluntarily administering the survey to materials users they regulate, and eight

states have agreed to participate. The NRC has determined that a standardized voluntary survey is the most practical means of gathering feedback on its outreach and communications regarding the Safety Culture Policy Statement. Using a survey approach for the evaluation allows for input to be solicited from a wide range of licensees in an efficient and consistent manner.

Submit, by March 28, 2014, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?
