

current waiver, or reapplying for a waiver, provides application, monitoring, and toxic control program information. The state provides information on its determination whether the proposed conditions of the waiver ensure the protection of water quality, biological habitats, and beneficial uses of receiving waters, and whether the discharge will result in additional treatment, pollution control, or any other requirement for any other point or nonpoint sources. The state also provides information to certify that the discharge will meet all applicable state laws and that the state accepts all permit conditions. EPA requires updated information on the discharge to: (1) Determine whether the section 301(h) criteria are still being met and whether the section 301(h) waiver should be reissued; (2) determine whether the water quality, biological habitats, and beneficial uses of the receiving waters are protected; and (3) ensure that the permittee is effectively minimizing industrial and nonindustrial toxic pollutant and pesticide discharges into the treatment works. EPA needs information from the state to: (1) Allow the state's views to be taken into account when EPA reviews the section 301(h) application and develops permit conditions; and (2) ensure that all state laws are met and that the state accepts all permit conditions. This information is the means by which the state can non-concur with a section 301(h) approval decision made by the EPA Regional office. Regulations implementing CWA section 301(h) are found at 40 CFR part 125, subpart G. The information covered by this information collection request involves treatment plant operating data, effects of POTWs' discharges on marine environments, and states' viewpoints on issues concerning effects of POTWs' discharges on marine environments.

Form Numbers: "None."

Respondents/affected entities: Entities potentially affected by this action are those municipalities that currently have section 301(h) waivers from secondary treatment, or have applied for a renewal of a section 301(h) waiver, and the states within which these municipalities are located.

Respondent's obligation to respond: Required to obtain or retain a benefit.

Estimated number of respondents: 37 (total).

Frequency of response: From once every five years, to varies case-by-case, depending on the category of information.

Total estimated burden: 59,370 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1.3 million (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease in the total estimated respondent burden compared with the ICR currently approved by OMB, due to changes in the respondent universe, program status, information needs, and the use of technology.

EPA ICR No.: 1569.08

OMB Control No.: 2040-0153

Abstract: Under the provisions of national Program Development and Approval Guidance implementing section 6217 of the Coastal Zone Act Reauthorization Amendments of 1990 (CZARA) which was jointly developed and published by EPA and the National Oceanic and Atmospheric Administration (NOAA), 29 coastal States and 5 coastal Territories with federally approved Coastal Zone Management Programs have developed and submitted to EPA and NOAA Coastal Nonpoint Pollution Programs. Another State (Illinois) is developing its program for submittal to EPA and NOAA in early 2014. EPA and NOAA have fully approved 17 States and 5 Territories, and conditionally approved 11 States. Another State that was conditionally approved (Alaska) ceased its participation in this program in 2011. States and Territories with conditional approvals are required to submit additional information in order to obtain final program approval. CZARA section 6217 requires States and Territories to obtain final approval of their Coastal Nonpoint Pollution Programs in order to retain their full

share of funding available to them under section 319 of the Clean Water Act and section 306 of the Coastal Zone Management Act.

Form Numbers: None.

Respondents/affected entities: Entities affected by this action are 11 coastal States with conditionally approved Coastal Nonpoint Pollution Control Programs and 1 coastal State that will submit its program for federal approval in 2014.

Respondent's obligation to respond: Required to obtain or retain benefits.

Estimated number of respondents: 12 States (total).

Frequency of response: On occasion.

Total estimated burden: 1,500 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$55,500 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 125 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is the result of progress that States which are not yet unconditionally approved have made that have resulted in the reduction in the number of conditions imposed on them by EPA and NOAA, offset by the addition of a new State coastal nonpoint program (Illinois), as well as the sunseting of one State program in 2011 (Alaska).
