**SUPPLEMENTARY INFORMATION:**

**I. Abstract and request for comments**

NCUA is amending/reinstating the collection for 3133–0067. The Federal Credit Union Act, 12 U.S.C. 1782(a)(1), requires federally insured credit unions to make reports of condition to the NCUA Board upon dates the Board selects. NCUA collects the financial and statistical information on a monthly basis and uses it to monitor financial and statistical trends in corporate credit unions and to allocate examination and supervision resources. If this information was not collected, NCUA would not be able to effectively fulfill its primary mission of regulating and supervising credit unions. The burden on the industry continues to decline as a result of mergers of corporate credit unions.

NCUA requests that you send your comments on this collection to the location listed in the **ADDRESSES** section. Your comments should address: (a) the necessity of the information collection for the proper performance of NCUA, including whether the information will have practical utility; (b) the accuracy of our estimate of the burden (hours and cost) of the collection of information, including the validity of the methodology and assumptions used; (c)

ways we could enhance the quality, utility, and clarity of the information to be collected; and (d) ways we could minimize the burden of the collection of the information on the respondents such as through the use of automated collection techniques or other forms of information technology. It is NCUA's policy to make all comments available to the public for review.

The collected fish would be used to study the effects of a warming Southern Ocean on development of the embryos of Antarctic fishes. Data collected under this permit would be part of a long-term (28 year) dataset. Approximately 50 hours of trawling would be conducted in ASPA 152 and approximately 20 hours would be conducted in ASPA 153. Sixteen traps would be set and allowed to soak for a total of 3 days.

Live fishes would be transported to the aquarium facilities at Palmer Station for experimentation. Breeding and biochemical experiments would be conducted. All experimental animals would be humanely euthanized and properly disposed of outside the ASPAs
