SUPPLEMENTARY INFORMATION:

I. Abstract

We receive annual appropriations to implement the National Fish Habitat Action Plan. We use these funds to:

- Support our participation in the National Fish Habitat Board and activities of the Board.
- Support Action Plan coordination and leadership at the Regional level.
- Implement habitat-based cost-shared projects.

Funds used to implement habitat-based cost-shared projects (project funds) are subject to reallocation each year. The Director allocates the available project funding among Fish Habitat Partnerships (FHPs) consistent with the goals and strategies of the National Fish Habitat Board. In FY 2014, we will implement a competitive, performance-based process to allocate project funds. We will distribute project funds among FHPs in two categories: (1) Stable operational support and (2) competitive, performance-based funds to encourage strategic conservation delivery. To determine which projects receive funding, we will collect the following information:

Justification for Stable Operational Support (\$75,000 per year). To be eligible to receive stable operational support, FHPs must submit a justification that provides an overview of all projects and activities over the previous 3 years and anticipated projects and activities over the next 3 years. The justification should concisely describe these projects and activities as well as how these projects and activities (both individually and collectively) have contributed, or are expected to contribute, to achieving FHP goals and leverage partner resources and capabilities.

Accomplishments Report and Work Plan. To compete for performance-based funds, FHPs must submit:

- *Accomplishments Report* that provides a detailed description of all

projects and activities of the FHP over the previous 3 years.

- *Work Plan* consisting of a prioritized list of new or ongoing habitat projects over the next year. The work plan will include, but not be limited to, project title, funds requested, anticipated partner contributions, measurable goals and objectives, and proposed conservation actions that will produce desired conservation outcomes and achieve project goals and objectives.

Application. FHPs will solicit proposals for Service funding. Applicants must submit an application that describes in substantial detail project locations, benefits, funding, and other characteristics.

Performance and Financial Reports. Persons or entities receiving project funding must submit annual

performance and financial reports that contain information necessary for us to track costs and accomplishments. Performance reports will include:

- A comparison of actual accomplishments to the goals and objectives established for the reporting period, the results/findings, or both;
- If the goals and objectives were not met, the reasons why, including analysis and explanation of cost overruns or high unit costs compared to the benefit received to reach an objective; and
- Performance metrics, such as the number of stream miles or acres of riparian habitat restored or protected by the project, the number of fish passage barriers removed, and the aquatic species benefitted by the project.
