The original permit (No. 14352), issued on October 15, 2009, authorized health assessments of bottlenose dolphins (*Tursiops truncatus*) in Florida's Indian River Lagoon system by capturing, sampling, and releasing up to 40 dolphins per year. Captured dolphins may receive a complete clinical workup and a roto tag. Up to ten animals per year may also receive a VHF tag. Samples may be analyzed to examine a variety of health topics. An additional 400 dolphins per year may be harassed during pre- and post-capture surveys in

the Indian River Lagoon. The permit would also authorize two accidental mortalities over the five-year permit. The permit was amended on April 1, 2011 (76 FR 20957) to authorize research in Charleston, South Carolina. Fifty bottlenose dolphins may be captured, sampled, and released in Charleston annually. Captured dolphins may receive a health assessment clinical workup and a roto tag. Up to ten animals per year may also receive a VHF tag. Samples may be analyzed to examine a variety of health topics such as: infectious diseases, immune status, contaminant exposure, antibiotic resistance, and genetics. Annually, 400 dolphins may be harassed during pre- and post-capture surveys around Charleston. The permit was amended a second time on April 18, 2012, to allow an additional type of roto tag attachment. The original permit expiration date was October 31, 2014. The minor amendment (No. 14352-03) extends the duration of the permit through October 31, 2015, but does not change any other terms or conditions of the permit.

Dated: January 31, 2014.
