SUMMARY: This notice provides BOEM's determination that there is no competitive interest in the area requested by Principle Power, Incorporated (PPI) to acquire an Outer Continental Shelf (OCS) commercial wind lease as described in the *Potential Commercial Leasing for Wind Power on the Outer Continental Shelf (OCS) Offshore Oregon, Request for Interest (RFI)* that BOEM published on September 30, 2013 (78 FR 59968). The RFI described the WindFloat Pacific Project proposal submitted to BOEM by PPI to acquire a commercial wind lease on the OCS offshore Oregon, and provided an opportunity for the public to submit comments about the proposal.

DATES: Effective February 6, 2014.

SUPPLEMENTARY INFORMATION:**Authority**

This Determination of No Competitive Interest (DNCI) is published pursuant to subsection 8(p)(3) of the OCS Lands Act (43 U.S.C. 1337(p)(3)), and the implementing regulations at 30 CFR Part 585. Subsection 8(p)(3) of the OCS Lands Act requires that OCS renewable energy leases, easements, and rights-of-way be issued “on a competitive basis unless the Secretary [of the Interior] determines after public notice of a proposed lease, easement, or right-of-way (ROW) that there is no competitive interest.” The Secretary delegated the authority to make such determinations to BOEM.

Determination and Next Steps

This DNCI provides notice to the public that BOEM has determined there is no competitive interest in the proposed lease area, as no indications of competitive interest were submitted in response to the RFI.

In the RFI, BOEM also solicited public input regarding the area described in the

notice, the potential environmental consequences of wind energy development in the area, and multiple uses of the area. In response to the RFI, BOEM received public comment submissions from 18 entities. BOEM will use the comments it received to inform its subsequent decisions. After publication of this DNCI, BOEM will proceed with the noncompetitive lease issuance process outlined at 30 CFR 585.231.

Speakers from the DOE Office of Nuclear Energy will present work on a range of studies, including performance assessment modeling of a generic salt disposal system for SNF and HLW, coupled models for thermal-hydrological-chemical and thermal-hydrological-mechanical processes in a salt repository, and brine migration experimental studies for salt repositories. The Board also will hear a presentation on DOE activities related to resumption of NRC work on the Yucca Mountain License Application. In addition, a speaker from the DOE Office of Environmental Management will describe lessons learned from managing

remote-handled radioactive wastes at the Waste Isolation Pilot Plant in Carlsbad, NM.

The meeting will begin at 8:00 a.m. and will be held at the Marriott Hotel, 2101 Louisiana Blvd. NE., Albuquerque, New Mexico; Tel. 505-881-6800, Fax 505-888-2982. The Board was established in the 1987 amendments to the Nuclear Waste Policy (NWP) as an independent agency in the Executive branch to perform an ongoing objective evaluation of the technical validity of activities undertaken by the U.S. Department of Energy related to implementing the NWP. Board members are experts in their fields and are appointed by the President from a list of candidates submitted by the National Academy of Sciences. The Board is required to report its findings, conclusions, and recommendations to Congress and the Secretary of Energy. Board reports, correspondence, congressional testimony, and meeting transcripts and materials are posted on the Board's Web site.
