

Paragraph (g)(1)(i) requires the employer to issue a permit for entering bins, silos, or tanks unless the employer or the employer's representative is present during the entire operation. The permit shall certify that the precautions contained in paragraph (g) have been implemented prior to employees entering bins, silos or tanks and shall be kept on file until completion of the entry operations.

Paragraph (g)(1)(ii) requires that the employer deenergize, disconnect, lockout and tag, block-off or otherwise prevent operation of all mechanical, electrical, hydraulic, and pneumatic equipment which presents a danger to employees inside grain storage structures.

Paragraphs (i)(1) and (i)(2) require the employer to inform contractors performing work at the grain handling facility of known potential fire and explosion hazards related to the contractor's work and work area, and to explain to the contractor the applicable provisions of the emergency action plan.

Paragraph (j)(1) requires the employer to develop and implement a written housekeeping program that establishes the frequency and method(s) determined best to reduce accumulations of fugitive grain dust on ledges, floors, equipment, and other exposed surfaces.

Under paragraph (m)(1), the employer is required to implement preventive maintenance procedures consisting of regularly scheduled inspections of at least the mechanical and safety control equipment associated with dryers, grain stream processing equipment, dust collection equipment including filter collectors, and bucket elevators. Paragraph (m)(3) requires a certification be maintained of each inspection. Paragraph (m)(4) requires the employer to implement procedures for the use of tags and locks which will prevent the inadvertent application of energy or motion to equipment being repaired, serviced, or adjusted.
