The Lake Charles Harbor and Terminal District, grantee of FTZ 87, submitted a notification of proposed production activity on behalf of LEEVAC Shipyards, LLC (LEEVAC), located in Lake Charles and Jennings, Louisiana. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on January 27, 2014.

The LEEVAC facilities are located at 111 Bunge Street, Jennings (Jefferson Davis Parish), Louisiana, and within Site 2 of FTZ 87 at 8200 Big Lake Road, Lake Charles (Calcasieu Parish), Louisiana. A separate application for subzone status at LEEVAC's Jennings shipyard was submitted and will be processed under Section 400.31 of the FTZ Board's regulations. The facilities are used for the construction and repair of oceangoing vessels. Pursuant to 15 CFR Section 400.14(b) of the regulations, FTZ activity would be limited to the specific foreign-status materials and components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt LEEVAC from customs duty payments on foreign status components used in export production. On its domestic sales, LEEVAC would be able to choose the duty rate during customs entry procedures that applies to oceangoing vessels (free) for the foreign status inputs noted below. Customs duties also could possibly be deferred or reduced on foreign status production equipment.

The components and materials sourced from abroad include: Coatings/resins; fittings; flanges; boxes/crates; handles; knobs; floor coverings; plaster tiles; life jackets; insulation; tableware; metal pipe fittings/flanges/elbows/

sleeves; anchors; steel wire; copper fittings/fasteners; nickel fittings; aluminum rods/profiles/fittings/ladders/hangers/forgings; lead pipes/fittings; zinc and tin tubes/pipes/fittings; base metal fittings; flexible tubing; boilers; steam and gas turbines and related parts; marine/diesel engines and related parts; hydrojet engines; turbine jets; fuel/cooling/ballast/macerator/hydraulic/bilge/sump/hydraulic/jet pumps and related parts; air/liquid compressors; turbochargers; winches; refrigeration/cooling equipment; heat exchangers; liquid purifiers; air/fuel filters; sprayers; derricks; deck machinery; evaporative air coolers; trash compactors; pressure/scupper/check/relief/gate/valves; roller bearings; transmissions and parts thereof (e.g., z-drives, shafts, gearboxes, clutches); pulleys; flywheels; acoustic baffles; propellers and blades; electric ballasts/motors/generators; generator sets; generator parts; transformers and related parts; starters; heaters and related parts; radio/TV/radar equipment; antennas; tuners; parts of signaling devices; electrical components and panels; switches/switching equipment; connectors; wiring harnesses; lamps; signal generators; displays; cables; mirrors; sonar apparatus; optical instruments; depth sounding equipment; micrometers and calipers; thermostats; chronometers; regulators; controllers; and, search lights (duty rate ranges from free to 6.7%; 17¢ each +2.5%, 1¢/jewel). The production activity under FTZ procedures would be subject to the "standard shipyard restriction" applicable to foreign origin steel mill products (e.g., angles, pipe, plate), which requires that LEEVAC must pay all applicable duties on such items.

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary at the address below. The closing period for their receipt is March 25, 2014.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230-0002, and in the "Reading Room" section of the FTZ Board's Web site, which is accessible via www.trade.gov/ftz.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new collection. The NOAA Sentinel Site Program (SSP) brings to life NOAA's science, service, and stewardship continuum by leveraging existing resources and integrating multiple parallel efforts to promote resilient coastal communities and ecosystems in the face of change. A primary purpose of the NOAA Sentinel Site Program is to directly engage local, state, and federal managers as part of a Sentinel Site Cooperative (SSC) team. By doing so, managers can help ensure the types of science conducted, information gathered, and products developed are immediately used for better management. With this point in mind, who is actually using the products and services developed by these Cooperatives, and to what degree

is capacity being built among and between coastal professionals and organizations through communications generated through the SSCs.

The purpose of this survey is to better understand the frequency and patterns of communication as a result of the efforts of the SSP. To help gather this information, NOAA will survey individuals known to have experience and insight with the SSP and inquire on the communications and collaborations that have resulted. This is intended to serve as a means of formative evaluation for this effort. A formative evaluation is used to assess programs or projects early in their development or implementation to provide information about how best to revise and modify for improvement. This type of evaluation often is helpful for new programs, such as the SSC, but can also be used to monitor the progress of ongoing programs.

II. Method of Collection

The survey will be provided to respondents in electronic format provided via email. Methods of submittal will also be via email of electronic forms.
