SUPPLEMENTARY INFORMATION:

I. Introduction

Under section 101 of the Federal Mine Safety and Health Act of 1977, a mine operator may petition and the Secretary of Labor (Secretary) may modify the application of a mandatory safety standard to that mine if the Secretary determines that: (1) An alternative method exists that will guarantee no less protection for the miners affected than that provided by the standard; or (2) that the application of the standard will result in a diminution of safety to the affected miners.

MSHA bases the final decision on the petitioner's statements, any comments and information submitted by interested persons, and a field investigation of the conditions at the mine. In some instances, MSHA may approve a petition for modification on the condition that the mine operator complies with other requirements noted in the decision.

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M–2014–001–C.

Petitioner: CONSOL Buchanan Mining Company, 1000 CONSOL Energy Drive, Canonsburg, Pennsylvania 15317–6506.

Mine: Buchanan Mine #1 Mine, MSHA I.D. No. 44–04856, located in Buchanan County, Virginia.

Regulation Affected: 30 CFR 75.503 (Permissible electric face equipment; maintenance), (18.35(a)(5)(i) (Portable (trailing) cables and cords)).

Modification Request: The petitioner requests a modification of the existing standard to permit maximum length of trailing cables to be increased to 1,000 feet for supplying power to mining machines, section ventilation fans and roof bolters. The petitioner states that:

(1) This petition will apply only to trailing cables supplying three-phase, 995-volt power to mining machines and trailing cables supplying three-phase, 575-volt power to roof bolters and section ventilation fans.

(2) The maximum lengths of the 995-volt trailing cables and 575-volt trailing cables will be 1,000 feet.

(3) The 995-volt mining machine trailing cables will not be smaller than
