

nonmetal mines to develop and implement a rock burst control plan within 90 days after a rock burst has been experienced. Plans are required to include: Mining and operating procedures designed to reduce the occurrence of rock bursts; monitoring procedures where detection methods are used; and other measures to minimize exposure of persons to areas prone to rock bursts. Plans are also required to be updated as conditions warrant and are to be made available to MSHA inspectors and to miners or their representatives. The standard does not require that all underground metal and nonmetal mines develop these preventative measures, but it does require that all mines with a rock burst history develop and implement a rock burst control plan.

When rock bursts occur in an underground mine, they pose a serious threat to the safety of miners in the area affected by the burst. These bursts may reasonably be expected to result in the entrapment of miners, death, and serious physical harm. Recent mining technology has disclosed scientific methods of monitoring rock stresses which will allow for the prediction of an oncoming burst. These predictions can be used by the mine operator to move miners to safer locations and to establish areas which need relief drilling.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Rock Burst Control Plan, 30 CFR 57.3461 (Pertains to Underground Metal/Nonmetal Mines). MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This information collection request is available on <http://www.msha.gov/regs/fedreg/informationcollection/>

[informationcollection.asp](http://www.regulations.gov). The information collection request will be available on MSHA's Web site and on <http://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on www.regulations.gov and www.reginfo.gov.

The public may also examine publicly available documents at MSHA, 1100 Wilson Boulevard, Room 2350, Arlington, VA. Sign in at the receptionist's desk on the 21st floor.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

III. Current Actions

This request for collection of information contains provisions for Rock Burst Control Plan, 30 CFR 57.3461 (Pertains to Underground Metal/Nonmetal Mines). MSHA has updated the data in respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219-0097.

Affected Public: Business or other for-profit.

Number of Respondents: 2.

Frequency: On occasion.

Number of Responses: 2.

Annual Burden Hours: 24 hours.

Annual Respondent or Recordkeeper Cost: None.

Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: February 21, 2014.

Patricia W. Silvey,
Certifying Officer.

BILLING CODE 4510-43-P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219-0009]

Proposed Information Collection; Training Plans and Records of Training, for Underground Miners and Miners Working at Surface Mines and Surface Areas of Underground Mines

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3506(c)(2)(A). This program helps to assure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection for Training Plans and Records of Training, for Underground Miners and Miners Working at Surface Mines and Surface Areas of Underground Mines.

DATES: All comments must be received on or before April 28, 2014.

ADDRESSES: Comments concerning the information collection requirements of this notice may be sent by any of the methods listed below.

- *Federal E-Rulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments for docket number [MSHA-2013-0043].

- *Regular Mail:* Send comments to MSHA, Office of Standards, Regulations, and Variances, 1100 Wilson Boulevard, Room 2350, Arlington, VA 22209-3939.

- *Hand Delivery:* MSHA, 1100 Wilson Boulevard, Room 2350, Arlington, VA. Sign in at the receptionist's desk on the 21st floor.

FOR FURTHER INFORMATION CONTACT: Sheila McConnell, Acting Director, Office of Standards, Regulations, and Variances, MSHA, at MSHA.information.collections@dol.gov (email); 202-693-9440 (voice); or 202-693-9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, Section 101(a) of the Mine Act, 30 U.S.C. 811 authorizes the Secretary to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines.

The Mine Act, as amended, 30 U.S.C. 801 et seq., recognizes that education and training in the improvement of miner health and safety is an important element of federal efforts to make the nation's mines safe. Section 115(a) of the Mine Act states that "each operator of a coal or other mine shall have a health and safety training program which shall be approved by the Secretary." Title 30 CFR 48.3 and 48.23 require training plans for underground and surface mines, respectively. The standards are intended to assure that miners will be effectively trained in matters affecting their health and safety, with the ultimate goal of reducing the occurrence of injury and illness in the nation's mines.

Training plans are required to be submitted for approval to the MSHA District Manager for the area in which the mine is located. Plans must contain the following: (1) Company name, (2) mine name, (3) MSHA identification number of the mine, (4) the name and position of the person designated by the operator who is responsible for health and safety training at the mine, (5) a list of MSHA-approved instructors with whom the operator proposes to make arrangements to teach the courses and the courses each instructor is qualified to teach, (6) the location where training will be given for each course, (7) a description of the teaching methods and the course materials which are to be used in training, (8) the approximate number of miners employed at the mine and the maximum number who will attend each session of training, (9) the predicted time or periods of time when regularly scheduled refresher training will be given including the titles of courses to be taught, (10) the total number of instruction hours for each course, and (11) the predicted time and length of each session of training for new task training including a complete list of task assignments, the titles of personnel conducting the training, the outline of training procedures used, and the evaluation procedures used to

determine the effectiveness of the training.

Title 30 CFR 48.9 and 48.29 require records of training for underground and surface mines, respectively. Upon completion of each training program, the mine operator certifies on a form approved by the Secretary (MSHA Form 5000-23) that the miner has received the specified training in each subject area of the approved health and safety training plan.

The certificates are to be maintained by the operator for a period of two years for current employees and sixty days for terminated employees and must be available for inspection at the mine site. In addition, the miner is entitled to a copy of the certificate upon completion of the training and when he/she leaves the operator's employment.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Training Plans and Records of Training, for Underground Miners and Miners Working at Surface Mines and Surface Areas of Underground Mines. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This information collection request is available on <http://www.msha.gov/regs/fedreg/informationcollection/informationcollection.asp>. The information collection request will be available on MSHA's Web site and on <http://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on www.regulations.gov and www.reginfo.gov.

The public may also examine publicly available documents at MSHA, 1100

Wilson Boulevard, Room 2350, Arlington, VA. Sign in at the receptionist's desk on the 21st floor.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.
