Abstract: This regulation has a provision that EPA will use to authorize renewable fuel producers using certain foreign-grown feedstocks to use an aggregate approach to comply with the renewable biomass verification

provisions, akin to that applicable to producers using crops and crop residue grown in the United States. For this authorization, foreign based entities may petition EPA for approval of the aggregate compliance approach for specified renewable fuel feedstocks either in a foreign country as a whole or in a specified geographical area. This petition request for the aggregate compliance approach for foreign-grown crops and crop residue is voluntary, though, if approved by EPA, will offer the benefit that certain renewable biomass produced in a foreign country or geographical area can be counted as feedstock to make renewable fuel for credit under the Renewable Fuel Standard (RFS2) program.

Form Numbers: None

Respondents/affected entities: 15.

Respondent's obligation to respond:

Voluntary.

Estimated number of respondents: 15 (total).

Frequency of response: On occasion.

Total estimated burden: 600 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$ 68,400 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in Estimates: There is an increase of hours in the total estimated respondent burden compared with the ICR currently approved by OMB. The total hours increased by 400 due to a more accurate account of hours needed for foreign producers to complete the petition for approval that will offer the benefit that certain renewable biomass produced in a foreign country or geographical area can be counted as feedstock to make renewable fuel for credit under the Renewable Fuel Standard (RFS2). This change in burden hours increased the cost of this collection by \$54,204 per year. The respondent universe and responses remained the same in this collection.

Acting Director, Collection Strategies Division.
