

Section 3.141 relates to operational criteria for recognizing the transfer of risk in connection with a securitization. Section 3.141(b)(3) requires a national bank or Federal savings association to obtain a well-reasoned legal opinion confirming the enforceability of the credit risk mitigant in all relevant jurisdictions in order to recognize the transference of risk in connection with a synthetic securitization. An institution must demonstrate its comprehensive understanding of a securitization exposure under § 3.141(c)(2) for each securitization exposure by conducting an analysis of the risk characteristics of a securitization exposure prior to acquiring the exposure and document such analysis within three business days after acquiring the exposure. Sections 3.141(c)(2)(i) and (ii) require that institutions, on an on-going basis (at least quarterly), evaluate, review, and update as appropriate the analysis required under this section for each securitization exposure.

Section 3.142(h)(2), regarding the capital treatment for securitization exposures, requires a national bank or Federal savings association to disclose publicly if it has provided implicit support to a securitization and the regulatory capital impact to the institution of providing such implicit support.

Section 3.153(b), outlining the Internal Models Approach (IMA) for calculating risk-weighted assets for equity exposures, specifies that a national bank or Federal savings association must receive prior written approval from the OCC before it can use IMA.

Section 3.172 specifies that each advanced approaches national bank or Federal savings association that has completed the parallel run process must publicly disclose its total and tier 1 risk-based capital ratios and their components.

Section 3.173 addresses disclosures by an advanced approaches national bank or Federal savings association that is not a consolidated subsidiary of an equity that is subject to the Basel III disclosure requirements. An advanced approaches institution that is subject to the disclosure requirements must make the disclosures described in Tables 1 through 12. The institution must make these disclosures publicly available for each of the last three years (that is, twelve quarters) or such shorter period beginning on the effective date of this subpart E.

The tables to section 3.173 require qualitative and quantitative public disclosures for capital structure, capital adequacy, capital conservation and

countercyclical buffers, credit risk, securitization, operational risk, equities not subject to the market risk capital requirements, and interest rate risk for non-trading activities.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:

(a) Whether the collections of information are necessary for the proper performance of the OCC's functions, including whether the information has practical utility;

(b) The accuracy of the OCC's estimates of the burden of the information collections, including the validity of the methodology and assumptions used;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(d) Ways to minimize the burden of information collections on respondents, including through the use of automated collection techniques or other forms of information technology.

SUPPLEMENTARY INFORMATION:

PRA Approval of Forms Used by Individual Taxpayers

Under the PRA, OMB assigns a control number to each "collection of information" that it reviews and approves for use by an agency. The PRA also requires agencies to estimate the burden for each collection of information. Burden estimates for each control number are displayed in (1) PRA notices that accompany collections of information, (2) **Federal Register** notices such as this one, and (3) OMB's database of approved information collections.

Taxpayer Burden Model

The Individual Taxpayer Burden Model (ITBM) estimates burden experienced by individual taxpayers when complying with Federal tax laws and incorporates results from a survey of tax year 2011 individual taxpayers, conducted in 2012 and 2013. The approach to measuring burden focuses on the characteristics and activities undertaken by individual taxpayers in meeting their tax return filing obligations.

Burden is defined as the time and out-of-pocket costs incurred by taxpayers in complying with the Federal tax system and are estimated separately. Out-of-pocket costs include any expenses incurred by taxpayers to prepare and submit their tax returns. Examples include tax return preparation fees, the purchase price of tax preparation software, submission fees, photocopying costs, postage, and phone calls (if not toll-free).

The methodology distinguishes among preparation method, taxpayer activities, taxpayer type, filing method, and income level. Indicators of tax law and administrative complexity, as reflected in the tax forms and instructions, are incorporated into the model.

Preparation methods reflected in the model are as follows:

- Self-prepared without software,
- Self-prepared with software, and
- Use of a paid preparer or tax professional.

Types of taxpayer activities reflected in the model are as follows:

- Recordkeeping,
- Tax planning,
- Gathering tax materials,
- Use of services (IRS and other),
- Form completion, and
- Form submission.

Taxpayer Burden Estimates

Summary level results using this methodology are presented in Table 1 below. The data shown are the best forward-looking estimates available for income tax returns filed for tax year 2013.

Table 1 shows burden estimates based on current statutory requirements as of November 21, 2013 for taxpayers filing a 2013 Form 1040, 1040A, or 1040EZ tax return. Time spent and out-of-pocket costs are presented separately. Time burden is broken out by taxpayer activity, with record keeping representing the largest component. Out-of-pocket costs include any expenses incurred by taxpayers to prepare and submit their tax returns. Examples include tax return preparation and submission fees, postage and photocopying costs, and tax preparation software costs. While these estimates do not include burden associated with post-filing activities, IRS operational data indicate that electronically

prepared and filed returns have fewer arithmetic errors, implying lower post-filing burden.

Reported time and cost burdens are national averages and do not necessarily reflect a “typical” case. Most taxpayers experience lower than average burden, with taxpayer burden varying considerably by taxpayer type. For instance, the estimated average time burden for all taxpayers filing a Form 1040, 1040A, or 1040EZ is 12 hours, with an average cost of \$210 per return. This average includes all associated forms and schedules, across all preparation methods and taxpayer activities. The average burden for taxpayers filing Form 1040 is about 15 hours and \$280; the average burden for taxpayers filing Form 1040A is about 7 hours and \$90; and the average for Form 1040EZ filers is about 4 hours and \$30.

Within each of these estimates there is significant variation in taxpayer activity. For example, non-business taxpayers are expected to have an average burden of about 7 hours and \$120, while business taxpayers are expected to have an average burden of about 24 hours and \$430. Similarly, tax preparation fees and other out-of-pocket costs vary extensively depending on the tax situation of the taxpayer, the type of software or professional preparer used, and the geographic location.

Proposed PRA Submission to OMB

Title: U.S. Individual Income Tax Return.

OMB Number: 1545–0074.

Form Numbers: Form 1040 and Schedules A, B, C, C–EZ, D, D–1, E, EIC, F, H, J, R, and SE; Form 1040A; Form 1040EZ; Form 1040NR; Form 1040NR–EZ, Form 1040X; and all attachments to these forms (see the Appendix to this notice).

Abstract: These forms are used by individuals to report their income tax liability. The data is used to verify that the items reported on the forms are correct, and also for general statistical use.

Current Actions: The change in estimated aggregate compliance burden can be explained by three major sources—technical adjustments, statutory changes, and discretionary agency (IRS) actions.

Technical Adjustments—The largest adjustments are from incorporation of updated tax return data, macroeconomic data, and survey data as well as refinements in the estimation methodology. Updating the FY13 macroeconomic data and incorporating new tax return data lead to the largest technical adjustments. The impact of each technical adjustment can be seen below.

	Change in filers	Change in time	Change in dollars
Updated FY13 Macroeconomic Data	– 3,100,000	– 32,000,000	– 762,000,000
Updated Tax Return Data	0	– 53,000,000	– 1,486,000,000
Updated Survey Data	0	6,000,000	1,063,000,000
FY14 Population Estimates	1,700,000	4,000,000	908,000,000

Statutory Changes—The primary drivers of the statutory changes are the phaseout of itemized deductions (American Taxpayer Relief Act of 2012),

the Net Investment Income Tax (Health Care and Education Reconciliation Act of 2010), and the Additional Medicare Tax (Patient Protection and Affordable

Care Act of 2010). The estimated impact of these items is as follows:

	Expected filers	Change in hours	Change in dollars
Phaseout of Itemized Deductions	2,300,000	<500,000	\$21,000,000
Net Investment Income Tax	2,800,000	4,000,000	202,000,000
Additional Medicare Tax	3,100,000	3,000,000	129,000,000

IRS Discretionary Changes

Introduction of the Office in the Home Safe Harbor impacts approximately

600,000 filers and decreases time by 1,600,000 hours (rounded to 2,000,000 hours) and money by \$7,000,000. All

other IRS discretionary changes had a negligible impact on taxpayer burden.
