SUPPLEMENTARY INFORMATION: On December 10, 2013, EDA published a notice describing the IMCP (78 FR 74106), as well as the application criteria and process.

The IMCP is a new government-wide initiative that will help communities cultivate an environment for businesses to create well-paying manufacturing jobs in regions across the country and thereby accelerate the resurgence of manufacturing. The IMCP is designed to reward communities that demonstrate best practices in attracting and expanding manufacturing by bringing together key local stakeholders and using long-term planning that integrates targeted investments across a community's industrial ecosystem to create broad-based prosperity. A well-designed public investment is a key part of developing a self-sustaining ecosystem that attracts private investment from new and existing manufacturers and leads to broad-based prosperity.

Designation as an IMCP Manufacturing Community will be given to communities with the best strategies for designing and making such investments in public goods. EDA will designate up to 12 communities as Manufacturing Communities through the IMCP.

See the FRN (78 FR 74106) for further information on how to submit an application and how EDA will handle applications received.

Extension of Application Period

EDA has determined that a 30-day extension of the application period is necessary to provide the public adequate time to submit an application. Accordingly, the application period for the competition is extended through April 14, 2014.

Matthew S. Erskine,

Deputy Assistant Secretary for Economic Development.

BILLING CODE 3510-WH-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B-17-2014]

Foreign-Trade Zone (FTZ) 50—Long Beach, California; Notification of Proposed Production Activity; Forged Metals Inc. (Aerospace and Industrial Turbine Engine Parts, Forgings); Fontana, California

The Board of Harbor Commissioners of the Port of Long Beach, grantee of FTZ 50, submitted a notification of proposed production activity to the FTZ Board on behalf of Forged Metals Inc. (FMI), located in Fontana, California. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on February 4, 2014.

The FMI facility is located within Site 23 of FTZ 50. The facility is used for the production of nickel, aluminum, and titanium-based forgings and parts of turbine engines (e.g., rings and discs) used in aerospace and industrial gas turbine applications. Pursuant to 15 CFR 400.14(b), FTZ activity would be limited to the specific foreign-status materials and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board. The proposed scope of FTZ production authority would not involve inverted tariff benefits on foreign titanium inputs (all foreign titanium will be admitted to the zone in privileged foreign status (19 CFR 146.41)).

Production under FTZ procedures could exempt FMI from customs duty payments on the foreign status material inputs used in export production. On its domestic sales, FMI would be able to defer payment of customs duties on the foreign titanium inputs (duty rate—15%). Customs duties also could possibly be deferred or reduced on foreign status production equipment.

The materials sourced from abroad include: titanium alloy, aluminum alloy, and nickel alloy (duty rate ranges from free to 15%).

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary at the address below. The closing period for their receipt is April 14, 2014.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230-0002, and in the "Reading Room" section of the FTZ

Board's Web site, which is accessible via www.trade.gov/ftz.

FOR FURTHER INFORMATION CONTACT:

Pierre Duy at Pierre.Duy@trade.gov or (202) 482-1378.

Dated: February 20, 2014.

Andrew McGilvray,
Executive Secretary.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B-15-2014]

Foreign-Trade Zone (FTZ) 126—Reno, Nevada; Notification of Proposed Production Activity; Schlosser Forge Company d/b/a Schlosser Forge Company North (Aerospace and Industrial Turbine Engine Parts, Forgings); Verdi, Nevada

The Economic Development Authority of Western Nevada, grantee of FTZ 126, submitted a notification of proposed production activity to the FTZ Board on behalf of Schlosser Forge Company d/b/a Schlosser Forge Company North (Schlosser), located in Verdi, Nevada. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on February 4, 2014.

The Schlosser facility is located within Site 20 of FTZ 126. The facility is used for the production of nickel, aluminum, and titanium-based closed die forgings and parts of turbine engines (e.g., rings and discs) used in aerospace and industrial gas turbine applications. Pursuant to 15 CFR 400.14(b), FTZ activity would be limited to the specific foreign-status materials and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board. The proposed scope of FTZ production authority would not involve inverted tariff benefits on foreign titanium inputs (all foreign titanium will be admitted to the zone in privileged foreign status (19 CFR 146.41)).

Production under FTZ procedures could exempt Schlosser from customs duty payments on the foreign status material inputs used in export production. On its domestic sales, Schlosser would be able to defer payment of customs duties on the foreign titanium inputs (duty rate—15%). Customs duties also could possibly be deferred or reduced on foreign status production equipment.
