SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated by the Department of Energy (DOE) pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b), 7172(f)) and require authorization under section 202(e) of the Federal Power Act (16 U.S.C. 824a(e)).

On March 26, 2009, DOE issued Order No. EA–257–C, which authorized EES to transmit electric energy from the United States to Canada as a power marketer for a five-year term using existing international transmission facilities effective April 5, 2009. That authority expires on April 5, 2014. On February 25, 2014, EES filed an application with DOE for renewal of the export authority contained in Order No. EA–257–C for an additional five-year term. EES is requesting that the notice of this filing be published in the **Federal Register** as soon as possible; that the period for the submission of comments be shortened; and that the Department issue an order in an expedited manner. Further, EES requests that the existing Export Authorization be extended beyond the expiration date, to remain in effect until the date DOE acts on this application.

In its application, EES states that it does not own any electric generating or transmission facilities, and it does not have a franchised service area. The electric energy that EES proposes to export to Canada would be surplus energy purchased from electric utilities, Federal power marketing agencies, and other entities within the United States and/or Canada. The existing international transmission facilities to be utilized by EES have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission's (FERC) Rules of Practice and Procedures (18 CFR 385.211). Any person desiring to become a party to these proceedings should file a motion to intervene at the

above address in accordance with FERC Rule 214 (18 CFR 385.214). Five copies of such comments, protests, or motions to intervene should be sent to the address provided above on or before the date listed above.

Comments on the EES application to export electric energy to Canada should be clearly marked with OE Docket No. EA–257–D. An additional copy is to be provided directly to Will Szubielski, c/o Emera Energy Inc., 1223 Lower Water Street, Halifax, Nova Scotia B3J 3S8 and Bonnie A. Suchman, Troutman Sanders LLP, 401 9th Street NW., Suite 1000, Washington, DC 20004. A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after a determination is made by DOE that the proposed action will not have an adverse impact on the sufficiency of supply or reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program Web site at <http://energy.gov/node/11845>, or by emailing Angela Troy at Angela.Troy@hq.doe.gov.

On April 22, 2009, DOE issued Order No. EA–349, which authorized the Applicant to transmit electric energy from the United States to Canada as a power marketer for a five-year term using existing international transmission facilities. That authority expires on April 22, 2014. On February 18, 2014, the Applicant filed an application with DOE for renewal of the export authority contained in Order No. EA–349 for an additional ten-year term. Applicant request expedited review and issuance of Order to be effective on April 22, 2014, in order to avoid any lapse in authority to export electricity to Canada.

In its application, the Applicant states that it does not own any electric generating or transmission facilities, and it does not have a franchised service area. The electric energy that the Applicant proposes to export to Canada would be surplus energy purchased from electric utilities, Federal power marketing agencies, and other entities within the United States and/or Canada. The existing international transmission facilities to be utilized by the Applicant have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.
