ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the Federal Communications Commission invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

Privacy Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: The Commission does not consider the fact of filing a certification to be confidential or the responses provided on the face of the certification. The Commission will treat as presumptively confidential and exempt from routine public disclosure under the federal Freedom of Information Act: (1) Descriptions and documentation of alternative measures to mitigate the risks of nonconformance with certification standards; (2) information detailing specific corrective actions taken; and (3) supplemental information requested by the Commission or Bureau with respect to a certification.

Needs and Uses: This information collection is necessary to ensure that all Americans have access to reliable and resilient 911 communications, particularly in times of emergency, by requiring certain 911 service providers to certify implementation of key best practices or reasonable alternative measures. The information will be collected in the form of an electronically-filed, annual certification from each Covered 911 Service Provider, as defined in the

Commission's Report and Order, FCC 13-158.. in which the provider will indicate whether it has implemented certain industry-backed best practices. Providers that are able to respond in the affirmative to all elements of the certification will be deemed to satisfy the "reasonable measures" requirement in Section 12.4(b) of the Commission's rules. If a provider does not certify in the affirmative with respect to one or more elements of the certification, it must provide a brief explanation of what alternative measures it has taken, in light of the provider's particular facts and circumstances, to ensure reliable 911 service with respect to that element(s). Similarly, a service provider may also respond by demonstrating that a particular certification element is not applicable to its networks and must include a brief explanation of why the element(s) does not apply.

The information will be collected by the Public Safety and Homeland Security Bureau, FCC, for review and analysis, to verify that Covered 911 Service Providers are taking reasonable measures to maintain reliable 911 service. In certain cases, based on the information included in the certifications and subsequent coordination with the provider, the Commission may require remedial action to correct vulnerabilities in a service provider's 911 network if it determines that (a) the service provider has not, in fact, adhered to the best practices incorporated in the FCC's rules, or (b) in the case of providers employing alternative measures, that those measures were not reasonably sufficient to mitigate the associated risks of failure in these key areas. The Commission delegated authority to the Bureau to review certification information and follow up with service providers as appropriate to address deficiencies revealed by the certification

The purpose of the collection of this information is to verify that Covered 911 Service Providers are taking reasonable measures such that their networks comply with accepted best practices, and that, in the event they are not able to certify adherence to specific best practices, that they are taking reasonable alternative measures. The Commission adopted these rules in light of widespread 911 outages during the June 2012 derecho storm in the Midwest and Mid-Atlantic states, which revealed that multiple service providers did not take adequate precautions to maintain reliable service.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the proposed information requirements should be addressed to Miriam Lederer, Attorney, Division of Enforcement, Federal Trade Commission, Room M–8102B, 600 Pennsylvania Avenue NW., Washington, DC 20580, (202) 326–2975.

SUPPLEMENTARY INFORMATION: The Fuel Rating Rule, 16 CFR part 306 (OMB Control Number: 3084–0068), establishes standard procedures for determining, certifying, and disclosing

the octane rating of automotive gasoline and the automotive fuel rating of alternative liquid automotive fuels, as required by the Petroleum Marketing Practices Act. 15 U.S.C. 2822(a)¹(c). The Rule also requires refiners, producers, importers, distributors, and retailers to retain records showing how the ratings were determined, including delivery tickets or letters of certification.

Under the PRA, 44 U.S.C. 3501–3521, federal agencies must obtain approval from OMB for each collection of information they conduct or sponsor. "Collection of information" means agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. 44 U.S.C. 3502(3); 5 CFR 1320.3(c). As required by section 3506(c)(2)(A) of the PRA, the FTC is providing this opportunity for public comment before requesting that OMB extend the existing paperwork clearance for the regulations noted herein.

Pursuant to Section 3506(c)(2)(A) of the PRA, the FTC invites comments on: (1) Whether the disclosure and recordkeeping requirements are necessary, including whether the information will be practically useful; (2) the accuracy of our burden estimates, including whether the methodology and assumptions used are valid; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information. All comments should be filed as prescribed in the ADDRESSES section above, and must be received on or before May 12, 2014.

Estimated annual hours burden ¹ 33,700 total burden hours (13,750 recordkeeping hours + 19,950 disclosure hours).

¹ Under the Fuel Rating Rule, refiners, producers, importers, distributors, and retailers of automotive fuel must retain, for one year, records of any delivery tickets, letters of certification, or tests upon which they based the automotive fuel ratings that they certify or post. See the Fuel Rating Rule's recordkeeping requirements, 16 CFR 306.7; 306.9; and 306.11. The term automotive fuel includes gasoline and alternative liquid automotive fuels. 16 CFR 306.0 (i). Therefore, staff derived the number of fuel industry members by adding up the number of refiners, producers, importers, distributors, and retailers of these types of fuel. Staff consulted government agencies and industry sources in estimating a population of approximately 165,000 fuel industry members, including 159,597 retailers of automotive fuel.
