

POLICIES AND PRACTICES OF STORING, RETRIEVING, SAFEGUARDING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The records are maintained in an electronic relational database management system hosted on CSOSA's electronic network servers and/or through Survey Monkey, a GSA approved vendor's Internet server, accessed via a password-restricted system. Duplicate records also exist on magnetic backup tapes maintained by agency servers or on Survey Monkey.

RETRIEVABILITY:

Authorized CSOSA personnel can retrieve system records by using the employee's name and employee identification number. Authorized personnel can aggregate the results of individual and supervisor assessments and create reports, without specifically identifying individuals. Authorized personnel can also retrieve system records that produce raw data reports that will contain the identity of individuals. An employee can retrieve their own information and individual reports (which contain a record of how the individuals assessed themselves, along with how the supervisor assessed the position) using their name and employee identification number. All system records are accessed through the agency's computer network and/or a GSA approved Internet service provider through a password-restricted system.

SAFEGUARDS:

These records are maintained in controlled access areas. Identification cards are verified to ensure that only authorized personnel are present. Electronic records are protected by restricted access procedures, including the use of passwords and sign-on protocols which are periodically changed. Only employees whose official duties require access are allowed to view, administer, and control these records. The database will be maintained behind a firewall maintained by Survey Monkey, a GSA certified internet server provider, and the agency's own firewall software programs.

RETENTION AND DISPOSAL:

System records are retained and disposed of according to CSOSA's records maintenance and disposition schedules and the requirements of the National Archives and Records Administration. Any attempts to complete and completed competency assessments are archived to a computerized storage disk nightly and retained on the agency's backup

computer network server for five years. When records are purged from the agency's computer server, the records are transferred to a Compact Disc (CD) or other electronic media. Records in electronic media are electronically erased. CD or other electronic media are maintained for five years.
