

harassment) of small numbers of certain species of marine mammals. The requested take estimates represent small numbers relative to the affected species or stock sizes (i.e., all are less than or equal to 8%). See Table 5 for the requested authorized take numbers of marine mammals.

Endangered Species Act

Of the species of marine mammals that may occur in the survey area, several are listed as endangered under the ESA, including the humpback, sei, fin, blue, and sperm whales. NSF and ASC did not request take of endangered Southern right whales due to the low likelihood of encountering this species during the cruise. Under section 7 of the ESA, NSF, on behalf of ASC and five other research institutions, initiated formal consultation with the NMFS, Office of Protected Resources, Endangered Species Act Interagency Cooperation Division, on this low-energy seismic survey. NMFS's Office of Protected Resources, Permits and Conservation Division, also initiated formal consultation under section 7 of the ESA with the Endangered Species Act Interagency Cooperation Division, to obtain a Biological Opinion evaluating the effects of issuing the IHA under section 101(a)(5)(D) of the MMPA on threatened and endangered marine mammals. These two consultations were consolidated and addressed in a single Biological Opinion addressing the effects of these actions. NMFS's Biological Opinion concluded that the action and issuance of the IHA are not likely to jeopardize the continued existence of listed species and included an Incidental Take Statement incorporating the requirements of the IHA as Terms and Conditions. The Biological Opinion also concluded that designated critical habitat of these species does not occur in the action area.

National Environmental Policy Act

NSF and ASC provided NMFS a "Initial Environmental Evaluation/Environmental Assessment to Conduct Marine-Based Studies of the Totten Glacier System and Marine Record of Cryosphere—Ocean Dynamics," (IEE/EA) prepared by AECOM on behalf of NSF and ASC. The IEE/EA analyzes the direct, indirect, and cumulative environmental impacts of the planned specified activities on marine mammals including those listed as threatened or endangered under the ESA. NMFS, after review and evaluation of the NSF and ASC IEE/EA for consistency with the regulations published by the Council of Environmental Quality (CEQ) and

NOAA Administrative Order 126–6, Environmental Review Procedures for Implementing the National Environmental Policy Act, prepared an independent Environmental Assessment (EA) titled "Environmental Assessment on the Issuance of an Incidental Harassment Authorization to the National Science Foundation and Antarctic Support Contract to Take Marine Mammals by Harassment Incidental to a Low-Energy Marine Geophysical Survey in the Dumont d'Urville Sea off the Coast of East Antarctica, January to March 2014." NMFS has determined that the issuance of the IHA is not likely to result in significant impacts on the human environment and issued a Finding of No Significant Impact (FONSI).

Authorization

NMFS has issued an IHA to NSF and ASC for the take, by Level B harassment, of small numbers of marine mammals incidental to conducting a low-energy marine seismic survey in the Dumont d'Urville Sea off the coast of East Antarctica, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.
