**Notice of Availability of the Final
Environmental Impact Statement for
the Arturo Mine Project, Elko County,
NV**

AGENCY: Bureau of Land Management,
Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended, and the Federal Land Policy and Management Act of 1976, as amended, the Bureau of Land Management (BLM) has prepared a Final Environmental Impact Statement (EIS) for the Arturo Mine Project and by this notice is announcing its release for public review.

DATES: The BLM will not issue a final decision on the proposal for a minimum of 30 days of the date that the Environmental Protection Agency publishes their notice in the **Federal Register**.

ADDRESSES: Copies of the Final EIS for the Arturo Mine Project are available for public inspection at the BLM Elko District Office. Interested persons may also review the Final EIS on the Internet at http://www.blm.gov/nv/st/en/fo/elko_field_office/blm_information/nepa/nepa_archives/NEPA_Front.html.

FOR FURTHER INFORMATION CONTACT: John Daniel, Project Manager, telephone: 775-753-0277; address: 3900 Idaho Street, Elko, NV 89801; email: BLM_NV_ELDOArturoEIS_Comments@blm.gov.

Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Barrick-Dee Mining Venture, Inc., proposes to develop the Arturo Mine Project by expansion of the existing open-pit Dee Gold Mine, which is currently in closure and reclamation, and create approximately 240 jobs. The Dee Gold Mine is 45 miles northwest of Elko in Elko County, Nevada. The proposed project would create approximately 2,774 acres of new surface disturbance on public lands administered by the BLM. While dewatering is not proposed

for this project, pit lakes would form as a result of cessation of dewatering at the Goldstrike Mine, located approximately 8 miles to the southeast.

The project proposal would include the expansion of the existing open pit from one to three lobes, construction of two new waste-rock disposal storage facilities, a new heap leach facility, new support facilities to include an office, substation and associated power transmission lines, water wells, water distribution and sewer systems, landfill, mined material stockpile, communications site, stormwater control features, haul roads and an access road, and continued surface exploration.

Mill-grade ore would be transported to the Barrick Gold Mining, Inc.'s Goldstrike Mine using the Bootstrap Mine Haul Road and would be processed at the existing mill facilities located approximately 8 miles to the southeast of the proposed project. Low-grade ore would be processed on-site at the proposed heap leach pad and associated processing facilities. Mine operations and processing would continue for approximately 10 years, followed by an estimated 3 years of site closure and reclamation. Reclamation would occur concurrently with mining to the extent possible.

Cooperating agencies in the development of the EIS include the Nevada Department of Wildlife and the Elko County Board of Commissioners. The Nevada Department of Wildlife is concerned about the loss of habitat for mule-deer and Greater Sage-Grouse associated with mine disturbance. The Elko County Board of Commissioners has raised concerns about economic impacts to local communities, including impacts to livestock grazing.

The Draft EIS for the Arturo Mine Project was published and available for review on January 18, 2013. A 45-day comment period occurred. The BLM received a total of six written comment submissions containing 140 individual items during the public comment period. Key issues identified by tribal members, groups or organizations, and governmental entities include: Potential impacts to cultural resources, discharge to surface water, seeps and springs, post-closure groundwater contamination, air quality, and loss of wildlife habitat including Greater Sage-Grouse Preliminary Priority Habitat. These issues are addressed in the Final EIS and impacts associated with active production were found to be not significant.

The Final EIS is an abbreviated final, correcting errors in the draft and adding a small amount of new information due

to some changes in equipment at the existing exploration facilities.

Comments on the Draft EIS received from the public and internal BLM review were considered and incorporated as appropriate into the Final EIS. Public comments resulted in the addition of clarifying text, but did not significantly change the analysis.

Following a 30-day Final EIS availability and review period, a Record of Decision (ROD) will be issued. The decision reached in the ROD is subject to appeal to the Interior Board of Land Appeals. The 30-day appeal period begins with the issuance of the ROD.

Authority: 40 CFR 1506.6, 40 CFR 1506.10.

Richard E. Adams,

Field Manager, Tuscarora Field Office.

**Notice of Availability of the Draft
Environmental Impact Statement for
the San Juan Basin Energy Connect
230kV Transmission Line Project in
New Mexico and Colorado**

AGENCY: Bureau of Land Management,
Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended (NEPA), the Bureau of Land Management (BLM) has prepared a Draft Environmental Impact Statement (EIS) for the San Juan Basin Energy Connect Project (Project) and by this notice is announcing the opening of the comment period.

DATES: To ensure that comments will be considered, the BLM must receive written comments on the Project Draft EIS within 45 days following the date the Environmental Protection Agency publishes its Notice of Availability in the **Federal Register**. The BLM will announce future meetings or hearings and any other public involvement activities at least 15 days in advance through public notices, media releases, and/or mailings.

ADDRESSES: You may submit comments related to the Draft EIS for the Project by any of the following methods:

- Web site: <http://www.blm.gov/nm/sjbec>.
- Email: blm_nm_ffo_comments@blm.gov.

- Fax: 505-564-7608.
- Mail: Bureau of Land Management, Farmington Field Office, 6251 College Blvd., Suite A, Farmington, NM 87402

Copies of the Project EIS are available in the Farmington Field Office at the above address.

FOR FURTHER INFORMATION CONTACT:

Marcy Romero, Project Manager, telephone 505-564-7727; address Farmington Field Office, 6251 College Blvd., Suite A, Farmington, NM 87402; email: blm_nm_ffo_comments@blm.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to contact Ms. Romero during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question for Ms. Romero. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Tri-State Generation and Transmission Association (Tri-State) submitted a right-of-way (ROW) application to construct, operate, and maintain a 230 kilovolt (kV) transmission line from the Farmington, New Mexico area to Ignacio, Colorado. The proposed transmission project would be located on BLM-managed public lands, Southern Ute Indian Tribe (Southern Ute) tribal lands, New Mexico State lands, and private lands. Tri-State seeks approval from the Bureau of Indian Affairs (BIA), relating to the portion of the project that would cross Southern Ute tribal lands, and the New Mexico State Land Office. Tri-State is also requesting approval from La Plata County for the operation and construction of the transmission line on private properties located in La Plata County. Tri-State is requesting financial assistance for the Project from the U.S. Department of Agriculture's Rural Utilities Service (RUS). Tri-State is also requesting approval from the Western Area Power Administration (Western) to interconnect its proposed 230 kV transmission line to Western's Shiprock Substation and also to locate the new Three Rivers Substation on Western's reserved area within BLM lands.

Before making a decision, Federal agencies, including the BLM, BIA, RUS, and Western, must comply with the requirements of NEPA, Section 106 of the National Historic Preservation Act (NHPA), and Section 7 of the Endangered Species Act (ESA). The BLM is the lead Federal agency for NEPA, NHPA, and ESA review and compliance. The EIS preparation is a joint process among the BLM and the cooperating agencies. The cooperating

agencies include the BIA, RUS, Western, Southern Ute, La Plata County, the New Mexico State Land Office, and the Navajo Nation. The purpose and need for BLM's action is to respond to TriState's ROW application for access to BLM-managed lands for the construction and operation of the transmission line, substations, and access roads.

The BLM published the Notice of Intent in the **Federal Register** on January 25, 2011 (76 FR 4371), and scoping continued to April 1, 2011. Three public scoping meetings and one agency scoping meeting were held on March 16 and 17, 2011, in Farmington and Aztec, New Mexico, and Ignacio, Colorado, to solicit comments on the scope of the EIS. The key issue topics resulting from scoping are: Lands and realty actions, processes, and effects; effects to visual resources, water and wetlands, air quality, cultural resources, the Old Spanish National Historic Trail, socioeconomic, and wildlife species and habitats; and public health and safety effects, and potential cumulative effects. Further details on scoping issues and comments received are in the scoping report available on the project Web site: <http://www.blm.gov/nm/sjbec>

This Draft EIS analyzes a No Action Alternative and two action alternatives: The Preferred Alternative and the Proposed Action. The action alternatives were developed from a comprehensive process that considered a wide range of electrical system and transmission route alternatives. Both action alternatives are about 65 miles long. The action alternatives would originate from Western's Shiprock Substation and would interconnect to a new substation, the Three Rivers Substation. From the new Three Rivers Substation, the transmission lines would extend to a new 230 kV substation, the Kiffen Canyon Substation, located just north of the City of Farmington's existing Glade Tap Substation. The action alternatives would continue northeast and would terminate at the existing Iron Horse Substation near Ignacio, Colorado. The action alternatives also include constructing access roads by building new unpaved roads, improving existing access roads, and using existing roads in their current state. The action alternatives differ in their proposed alignment for the transmission line and the supporting access network.

For this Draft EIS, the No Action Alternative indicates that the BLM would not grant Tri-State a ROW for the construction and operation of the proposed Project. The Project facilities, including transmission lines and

substations, would not be built and existing land uses, and present activities in the Project study area would continue. The No Action Alternative does not consider the potential for additional actions that could occur if the action alternatives were denied.

The BLM will use and coordinate the NEPA commenting process to satisfy the public involvement process for Section 106 of the NHPA (16 U.S.C. 470f) as provided for in 36 CFR 800.2(d)(3). Ongoing tribal consultations will continue to be conducted in accordance with policy and tribal concerns, including impacts on Indian trust assets. Federal, State, and local agencies, along with other stakeholders that may be interested or affected by the BLM's decision on this Project, are invited to participate. Please note that public comments and information submitted including names, street addresses, and email addresses of persons who submit comments will be available for public review and disclosure at the above address during regular business hours (8 a.m. to 4 p.m.), Monday through Friday, except holidays.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may publicly be made available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 40 CFR 1506.6, 40 CFR 1506.10.

Michael H. Tupper,
Acting State Director.
