Decision To Be Made

This FEIS informs NASA decision makers, regulating agencies, and the public of the potential environmental consequences of the proposed demolition of SSFL buildings and structures and the impacts of using the proposed technologies to achieve groundwater and soil remediation, as implemented through the Proposed Action. This FEIS analyzes a range of remedial technologies that might be implemented to achieve the proposed groundwater and soil remediation goals. NASA will use the FEIS analysis to consider the potential environmental and socioeconomic impacts from the Proposed Action. NASA's analysis includes evaluation of cumulative activities that might occur in the same area or timeframe as the Proposed Action. These activities were evaluated to identify potential environmental impacts that, when added to the Proposed Action's impacts, would result in a cumulative effect as a result of past, present, and reasonably foreseeable future actions. The EIS considered the Proposed Action with the adjacent environmental cleanup activities being conducted by DOE and Boeing. On the basis of the FEIS findings, NASA will
