**SUPPLEMENTARY INFORMATION:**

I. *Purpose of Notice:* This notice announces a roundtable event to solicit public input concerning the topics identified in part III, below, relating to the use of crowdsourcing and third-party preissuance submissions to identify relevant prior art and enhance the quality of examination as well as the quality of issued patents. Specifically, the Office is seeking comments on the potential uses of crowdsourcing during patent examination, as well as ways for increasing the quality and volume of third-party preissuance submissions. The public is invited to provide comments on these topics and to identify future topics for discussion.

II. *Background:* Over the past year, the Office has solicited ideas from the software community through the Software Partnership to enhance the quality of software-related patents. In response, the public has proposed crowdsourcing as a technique to expand the prior art available to examiners. Further, crowdsourcing prior art was identified as a means to strengthen patent quality in the executive actions announced by the White House on February 20, 2014. While crowdsourcing was suggested in the context of the Software Partnership, the Office is exploring strategies to use crowdsourcing to obtain relevant prior art and enhance the quality of examination across all technology areas. Information on the Software Partnership may be found at [http://www.uspto.gov/patents/init\\_events/software\\_partnership.jsp](http://www.uspto.gov/patents/init_events/software_partnership.jsp) and information on the White House executive actions is available at [http://www.uspto.gov/patents/init\\_events/executive\\_actions.jsp](http://www.uspto.gov/patents/init_events/executive_actions.jsp).

Crowdsourcing has the potential to help examiners in certain technology areas, such as software, where information that resides within the

technical community is often not readily available to examiners. Existing crowdsourcing Web sites have made use of third-party preissuance submissions to submit prior art to examiners. The preissuance submissions by third parties provision of the America Invents Act permits third parties to submit relevant prior art publications to patent examiners with a concise description of relevance. *See Changes To Implement the Preissuance Submissions by Third Parties Provision of the Leahy-Smith America Invents Act*, 77 FR 42150 (July 17, 2012). The Office is seeking ways to improve the quality and increase the volume of third-party submissions, and utilizing crowdsourcing may be one promising avenue for achieving these goals. Aside from increasing the quality and quantity of third-party submissions, the Office is exploring other ways that crowdsourcing may help examiners identify relevant prior art during examination and contribute to the quality of issued patents.

III. *Topics for Written Comments and Discussion at the Roundtable Event:* The Office seeks comments on the following topics regarding the current third-party submission process and ways the Office can use crowdsourcing to improve the quality of examination:

1. How can the Office leverage the collective knowledge available via crowdsourcing to provide an examiner with relevant prior art?
2. What suggestions do you have for the Office to encourage more third-party submissions from the scientific and technical community via crowdsourcing activities?
3. Aside from encouraging more third-party submissions, what are other ways the Office can leverage crowdsourcing to get relevant information from experts in the scientific and technical community to the examiner?
4. How can the Office encourage more third-party participation while ensuring that no protest or other form of preissuance opposition to the grant of a patent on an application is initiated after publication of the application?
5. What, if anything, is preventing you from submitting prior art as part of a third-party submission?

6. What other ideas do you have to ensure examiners have the most relevant prior art in front of them during examination?

The Office also seeks comments on any additional topics, not listed above, that might serve as a basis for future discussions regarding the current third-party submission process and ways the Office can use crowdsourcing to improve the quality of examination.
