

NACOSH is comprised of 12 members, all of whom the Secretary of Labor appoints. The terms of eight NACOSH members terminate on May 21, 2014 and the terms of the other four members expire just a few months later, on January 22, 2015. Given this, OSHA is accepting nominations for all 12 positions on NACOSH, which is composed of the following:

- Four public representatives;
- Two management representatives;
- Two labor representatives;
- Two occupational safety professional representatives; and
- Two occupational health professional representatives.

Pursuant to 29 CFR 1912a.2, the HHS Secretary designates one of the occupational health professional representative, one occupational safety professional representative, and two public representatives for appointment by the Secretary of Labor. OSHA will provide to HHS all nominations and supporting materials for the membership categories they designate.

NACOSH members serve staggered terms, unless the member becomes unable to serve, resigns, ceases to be qualified to serve, or is removed by the Secretary of Labor. As such, the Secretary will appoint six members to a two-year term and six to a three-year term. If a vacancy occurs before a term expires, the Secretary may appoint a new member who represents the same interest as the predecessor to serve the remainder of the unexpired term. The Committee must meet at least two times a year (29 U.S.C. 656(a)(1)).

Any interested person or organization may nominate one or more qualified persons for NACOSH membership. Nominations must include the nominee's name, occupation or current position, and contact information. The nomination also must identify the category that the candidate is qualified to represent, and include a resume of the nominee's background, experience, and qualifications. In addition, the nomination must state that the nominee is aware of the nomination and is willing to serve on and regularly attend NACOSH meetings.

The Secretary of Labor will appoint NACOSH members on the basis of their experience and competence in the field of occupational safety and health (29 CFR 1912a.2). The information OSHA receives through this nomination process, in addition to other relevant sources of information, will assist the Secretary of Labor in appointing members to serve on NACOSH. In appointing NACOSH members, the Secretary of Labor will consider individuals nominated in response to

this **Federal Register** notice, as well as other qualified individuals.

The U.S. Department of Labor (Department) is committed to equal opportunity in the workplace and seeks broad-based and diverse NACOSH membership. The Department will conduct a public records check of nominees before their appointment using publicly available, internet-based sources.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed. The NRC posts all comment submissions at <http://www.regulations.gov> as well as entering the comment submissions into ADAMS, and the NRC does not edit

Your request should state that the NRC will not edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for public comment a draft guide in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The DG, entitled, "Special Nuclear Material Doorway Monitors," is temporarily identified by its task number, DG-5038. Draft Guide-5038 is proposed Revision 1 of Regulatory Guide (RG) 5.27, dated June 1974.

The NRC proposes to update RG 5.27 because it is out of date and not current with contemporary consensus standards and specifications. The detection equipment has changed considerably since the RG was issued in 1974. The proposed revision provides current industry references that are well known and understood by the user community.

The RG applies to facilities that contain SNM of a type and quantity to require an MAA. An MAA is any location which contains special nuclear material, within a vault or a building, the roof, walls, and floor of which each constitute a physical barrier.

III. Backfitting and Issue Finality

This DG, if finalized, would apply to applicants for, and current and future holders of, special nuclear material licenses under part 70 of title 10 of the *Code of Federal Regulations* (10 CFR), and power reactor licenses under parts 50 and 52 and certificates of compliance or approvals of a compliance plan for gaseous diffusion plants under part 76 if they are also applicants for or holders of special nuclear material licenses under part 70. Issuance of this DG in final form would not constitute backfitting under 10 CFR parts 50, 70, or 76 and would not be otherwise
