

January 17, 2008 issue of the **Federal Register** (73 FR 3316).

Background and Purpose SOLAS Regulation III/1.5

On May 20, 2011, the IMO's Maritime Safety Committee adopted Resolution MSC.317(89). This resolution promulgated new SOLAS Regulation III/1.5, which entered into force on January 1, 2013. Regulation III/1.5 requires all SOLAS ships, regardless of build date, to identify and replace existing on-load release mechanisms that do not comply with paragraphs 4.4.7.6.4 to 4.4.7.6.6 of the IMO LSA Code with compliant release mechanisms, no later than the next scheduled dry-docking after July 1, 2014, but in any case before July 1, 2019. Regulation III/1.5 does not apply to the release mechanisms on free-fall lifeboats. This SOLAS amendment potentially affects the release mechanisms for any existing SOLAS lifeboats, and some SOLAS rescue boats, installed on U.S. ships subject to SOLAS.

IMO MSC.1/Circ.1392

In support of new SOLAS regulation III/1.5, IMO's Maritime Safety Committee, at the same session it approved Resolution MSC.317(89), promulgated IMO Circular MSC.1/Circ.1392 (Circular 1392) under the title, "Guidelines for Evaluation and Replacement of Lifeboat Release and Retrieval Systems." The purpose of Circular 1392 is to provide flag administrations, ship owners, and manufacturers of lifeboat release and retrieval systems a detailed process to achieve compliance with Regulation III/1.5. Circular 1392 outlines five major steps in evaluating existing lifeboat release and retrieval systems: (1) A design review; (2) a performance test; (3) a process for flag states to report to the IMO compliant and non-compliant systems; (4) procedures for replacement of non-compliant lifeboat release and retrieval systems; and (5) a one-time follow-up overhaul examination for existing systems.

A copy of Circular 1392 is available for viewing in the public docket for this notice. You may also download Circular 1392 from <http://www.imo.org> by clicking the following succession of links: "Our Work," "Circulars," and "Browse Circulars available at IMODOCS." Public users will need to establish a user name and password to access the Circular.

CG-ENG Policy Letter

The Coast Guard has not adopted domestic regulations to implement Regulation III/1.5. The Coast Guard

strongly urges voluntary compliance on the part of U.S. ships subject to SOLAS because any such ship that operates on international voyages without complying with Regulation III/1.5 past the applicable compliance date may be subject to detention or other administrative action by foreign port state officials.

A new CG-ENG policy letter is available in the docket for this notice. It provides guidance to enable U.S. ships subject to SOLAS to remain in compliance with SOLAS as amended by Resolution MSC.317(89), including detailed procedures to comply with the new requirements in Resolution MSC.317(89) and the guidance in Circular 1392.

The Coast Guard recognizes that Circular 1392 contains valuable safety improvements. Therefore, the Coast Guard recommends voluntary compliance with the guidelines in Circular 1392 for U.S. non-SOLAS ships, MODUs, and offshore facilities that carry lifeboats and rescue boats fitted with certain release mechanisms, as described in the Circular. We seek comments from the public on the application of Circular 1392 to U.S. vessels not subject to SOLAS.

The guidance contained in this notice is not a substitute for applicable legal requirements, nor is it itself a rule. It is not intended to nor does it impose legally binding requirements on any party. It represents the Coast Guard's current thinking on this topic and provides the public with an indication of current and future action being considered by the Coast Guard.
