SUPPLEMENTARY INFORMATION: On February 28, 2014, DOE published an updated notice of proposed determination (NOPD) in the **Federal Register** (79 FR 11345) to determine that computer systems meet the criteria for classification as a covered product under the Energy Policy and Conservation Act, as amended (EPCA, 42 U.S.C 6291, et seq.). The NOPD provided for the submission of comments from interested parties by March 31, 2014. Thereafter, interested parties requested an extension of the comment period. The Information

Technology Industry Council (ITI) stated that they wanted to provide clear guidance and propose definitions related to the scope of coverage for this rulemaking. The Consumer Electronics Association (CEA) stated additional time will enable them to complete and reference findings from their latest comprehensive energy use study in the comments, and gather additional feedback from impacted CEA members concerning scope and product classifications.

Based on ITI and CEA's requests, DOE determines that an extension of the public comment period to allow additional time for interested parties to submit comments is appropriate. Therefore, DOE is extending the comment period until April 15, 2014 to provide interested parties additional time to prepare and submit comments. Accordingly, DOE will consider any comments received by April 15, 2014 to be timely submitted.

Issued in Washington, DC, on March 26, 2014.

Kathleen B. Hogan,

Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

SUPPLEMENTARY INFORMATION:**Table of Contents**

- I. Introduction
- II. Proposals
- III. Notice and Comment
- IV. Ordering Paragraphs

I. Introduction

On March 27, 2014, the Postal Service filed a petition pursuant to 39 CFR 3050.11 requesting that the Commission initiate an informal rulemaking proceeding to consider changes to two analytical methods for use in periodic reporting.¹ The Petition identifies the proposed analytical method changes filed in this docket as Proposals One through Two.

II. Proposals

A. Proposal One: Proposed Change in RPW Methodology for Use of Additional PostalOne! and Self Service Kiosk Data To Replace ODIS-RPW Statistical Sampling Estimates

The Postal Service currently utilizes statistical sampling estimates from the Origin Destination Information System—Revenue, Pieces, and Weight (ODIS-RPW) to measure national revenue, pieces, and weight for Business Reply Mail (BRM), International Business Reply Service (IBRS) and Merchandise Return Service (MRS) mail. The Postal Service proposes to replace ODIS-RPW

estimates with data from its PostalOne! system (PostalOne data) and Self-Service Kiosk data (SSK data) for its Revenue, Pieces, and Weight (RPW) Report. *Id.* at 2. Because PostalOne and SSK data reflect “census” information, that is, information collected from previous BRM, IBRS, and MRS mailings, the Postal Service asserts that these data do not contain the sampling errors that are inherent in statistical sampling systems such as ODIS-RPW. *Id.* at 2, 6. The Postal Service suggests performing ratio adjustments to account for those offices that do not use the PostalOne system for processing BRM, IBRS, and MRS pieces. *Id.* at 6–7.

B. Proposal Two: TRACS Change to Fed Ex Night Turn Distribution Key

The Postal Service employs a distribution key to assign volume variable costs for the Fed Ex Night Turn air carrier in the Transportation Cost System (TRACS). The distribution key is currently based on an ongoing statistical sampling of mail conveyed through the Fed Ex Night Turn air carrier system. *Id.* at 11. The Postal Service proposes to replace the statistical sampling data with operations data obtained from the Surface Air Management System (SAMS), the Product Tracking System (PTS), the Foreign Postal Settlement (FPS) system, and data regularly collected by TRACS. It maintains that portions of the Postal Service census data are now sufficiently reliable to be the basis of the distribution key. *Id.*
