

Proposed Rules

Federal Register

Vol. 79, No. 67

Tuesday, April 8, 2014

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF ENERGY

10 CFR Part 431

[Docket No. EERE-2014-BT-TP-0006]

RIN 1904-AD16

Energy Conservation Program for Certain Commercial and Industrial Equipment: Test Procedure for Commercial Packaged Boilers

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Request for information (RFI); reopening of the comment period.

SUMMARY: The U.S. Department of Energy (DOE) has initiated a rulemaking and data collection process to consider amendments to DOE's test procedures for commercial packaged boilers, starting with an RFI published in the **Federal Register** on February 20, 2014. As part of that process, DOE is considering the potential for adoption of part-load efficiency measurement as part of this test procedure rulemaking and welcomes comment on a variety of related issues. Due to technical difficulties with the email address for the RFI, this document announces a new email address to submit comments, data, and information, and reopens the comment period through April 16, 2014.

DATES: DOE will accept written comments, data, and information regarding the test procedure for commercial packaged boilers published February 20, 2014 (79 FR 9643) received on or before April 16, 2014.

ADDRESSES: Interested persons are encouraged to submit comments electronically. However, interested persons may submit written comments, data, and other related information regarding the RFI for commercial packaged boilers, identified by docket number EERE-2014-BT-TP-0006 or Regulation Identifier Number (RIN) 1904-AD16, by any of the following methods:

- **Federal eRulemaking Portal:** www.regulations.gov. Follow the instructions for submitting comments.

- **Email:** commercial_packaged_boilers@ee.doe.gov. Include docket number EERE-2014-BT-TP-0006 and/or RIN 1904-AD16 in the subject line of the message. All comments should clearly identify the name, address, and, if appropriate, organization of the commenter. Submit electronic comments either in WordPerfect, Microsoft Word, portable document format (PDF), or American Standard Code for Information Interchange (ASCII) file format, and avoid the use of special characters or any form of encryption.

- **Postal Mail:** Ms. Brenda Edwards, U.S. Department of Energy, Building Technologies Office, Mailstop EE-5B, Framework Document for Commercial and Industrial Air Compressors, Docket No. EERE-2014-BT-TP-0006 and/or RIN 1904-AD16, 1000 Independence Avenue SW., Washington, DC 20585-0121. If possible, please submit all items on a compact disc (CD), in which case it is not necessary to include printed copies. (Please note that comments sent by mail are often delayed and may be damaged by mail screening processes.)

- **Hand Delivery/Courier:** Ms. Brenda Edwards, U.S. Department of Energy, Building Technologies Office, Sixth Floor, 950 L'Enfant Plaza SW., Washington, DC 20024. Telephone: (202) 586-2945. If possible, please submit all items on a CD, in which case it is not necessary to include printed copies.

Instructions: All submissions received must include the agency name and docket number and/or RIN for this rulemaking. No telefacsimiles (faxes) will be accepted.

Docket: The docket is available for review at www.regulations.gov, and will include **Federal Register** notices, public meeting attendee lists and transcripts, comments, and other supporting documents/materials throughout the rulemaking process. All documents in the docket are listed in the www.regulations.gov index. However, not all documents listed in the index may be publicly available, such as information that is exempt from public disclosure.

A link to the docket Web page can be found at: http://www1.eere.energy.gov/buildings/appliance_standards/

[rulemaking.aspx?ruleid=87](http://www.regulations.gov/rulemaking.aspx?ruleid=87). This Web page contains a link to the docket for this notice on the www.regulations.gov site. The www.regulations.gov Web page contains instructions on how to access all documents, including public comments, in the docket.

FOR FURTHER INFORMATION CONTACT: Mr. James Raba, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE-5B, 1000 Independence Avenue SW., Washington, DC 20585-0121. Telephone: (202) 586-8654. Email: commercial_packaged_boilers@ee.doe.gov.

Mr. Eric Stas, U.S. Department of Energy, Office of the General Counsel, GC-71, 1000 Independence Avenue SW., Washington, DC 20585-0121. Telephone: (202) 586-9507. Email: Eric.Stas@hq.doe.gov.

For information on how to submit or review public comments, contact Ms. Brenda Edwards, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE-5B, 1000 Independence Avenue SW., Washington, DC 20585-0121. Telephone (202) 586-2945. Email: Brenda.Edwards@ee.doe.gov.

SUPPLEMENTARY INFORMATION: On February 20, 2014, DOE published a notice in the **Federal Register** announcing a request for information about test procedures for commercial packaged boilers. 79 FR 9643. The notice requested that comments, data, and information be submitted to CommPackagedBoilers2014TP0006@ee.doe.gov on or before the close of the comment period March 24, 2014. Due to technical difficulties associated with the rulemaking inbox established in the **Federal Register** notice and in order to provide interested parties with an adequate opportunity to submit their comments and related information, DOE has established a new email address where interested parties may submit comments to commercial_packaged_boilers@ee.doe.gov and has determined that it is appropriate to reopen the comment period. Accordingly, DOE is hereby reopening the comment period and will consider any comments received on or before April 16, 2014 to be timely submitted. DOE continues to seek comment on a variety of issues it has identified; these issues mainly

concern part-load operation and efficiency, appropriate operating conditions both for part-load and full-load operation, and the integration of part-load measurements into the applicable energy efficiency metric. Although DOE welcomes comment on all aspects of its test procedure, DOE is particularly interested in receiving comments and data from stakeholders and the public on these topics.

Issued in Washington, DC, on March 31, 2014.

Kathleen B. Hogan,

Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

14 CFR Part 39

[Docket No. FAA-2014-0190; Directorate Identifier 2012-NM-188-AD]

RIN 2120-AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to supersede airworthiness directive (AD) 2011-17-08, which applies to all Airbus Model A330-200 series airplanes, Model A330-200 Freighter series airplanes, and Model A330-300 series airplanes. AD 2011-17-08 currently requires revising the maintenance program by incorporating certain Airworthiness Limitation Items (ALIs). Since we issued AD 2011-17-08, Airbus has revised a certain ALI document, which specifies more restrictive instructions and/or airworthiness limitations. This proposed AD would revise the maintenance or inspection program, as applicable, to incorporate new or revised structural inspection requirements. We are proposing this AD to detect and correct fatigue cracking, damage, and corrosion in certain structure, which could result in reduced structural integrity of the airplane.

DATES: We must receive comments on this proposed AD by May 23, 2014.

ADDRESSES: You may send comments by any of the following methods:

- Federal eRulemaking Portal: Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.

- Fax: (202) 493-2251.

- Mail: U.S. Department of

Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

- Hand Delivery: U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Airbus SAS—Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email airworthiness.A330-A340@airbus.com; Internet <http://www.airbus.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2014-0190; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT:

Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone (425) 227-1138; fax (425) 227-1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include “Docket No. FAA-2014-0190; Directorate Identifier 2012-NM-188-AD” at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

On August 2, 2011, we issued AD 2011-17-08, Amendment 39-16772 (76 FR 53303, August 26, 2011), which superseded AD 2006-09-07, Amendment 39-14577 (71 FR 25919, May 3, 2006). AD 2011-17-08 required actions intended to address an unsafe condition on the products listed above.

Since we issued AD 2011-17-08, Amendment 39-16772 (76 FR 53303, August 26, 2011), the European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued EASA Airworthiness Directive 2012-0211, dated October 12, 2012 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for the specified products. The MCAI states:

The airworthiness limitations are currently defined and published in the Airbus A330 Airworthiness Limitations Section (ALS).

The airworthiness limitations applicable to the Damage Tolerant Airworthiness Limitation Items (DT ALI) are currently specified in Airbus A330 ALI, Airbus Document reference AI/SE-M4/95A.0089/97, which is approved by EASA and referenced in Airbus ALS Part 2.

Issue 19 of the Airbus A330 ALI Document introduces more restrictive maintenance requirements and/or airworthiness limitations. Failure to comply with the relevant instructions could result in an unsafe condition.

For the reasons described above, this [EASA] AD retains the requirements of EASA AD 2010-0174 [http://ad.easa.europa.eu/blob/easa_ad_2010_0174_superseded.pdf] AD 2010-0174 1] [which corresponds to FAA AD 2011-17-08, Amendment 39-16772 (76 FR 53303, August 26, 2011)], which is superseded, and requires the implementation of the new or more restrictive maintenance instructions and/or airworthiness limitations as specified in Airbus A330 ALI Document reference AI/SE-M4/95A.0089/97 issue 19.

The unsafe condition is fatigue cracking, damage, and corrosion in certain structure, which could result in reduced structural integrity of the airplane. You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating it in Docket No. FAA-2014-0190.

Relevant Service Information

Airbus has issued the following service information.
