The DoD ABIS matches and stores biometric data collected by global U.S. forces during the course of military operations. Data may also be collected for use in field identification and recovery of persons, or their physical remains, who have been captured,

detained, missing, prisoners of war (POW), or personnel recovered from hostile control.

Records in the system pertain to military operations conducted by all Combatant Commands (COCOMs) across the globe. Individuals covered include members of the U.S. Armed Forces; Department of Defense (DoD) civilian and contractor personnel; military reserve, Army and Air National Guard personnel; and other individuals requesting access to U.S. installations and facilities. DoD has used the information collected and processed to the Terrorist Screening Center to place individuals on National Watchlists. Without this collection, matching, and sharing of biometric and associate contextual information there would be grave implications to National Security and security of our forces deployed abroad.
