SUPPLEMENTAL INFORMATION:

I. Notice of the Application for Expansion

The Occupational Safety and Health Administration is providing notice that Underwriters Laboratories, Inc. (UL) is applying for expansion of its current recognition as an NRTL. UL requests the addition of 21 test standards to its NRTL scope of recognition.

OSHA recognition of an NRTL signifies that the organization meets the requirements specified in Title 29, Code of Federal Regulations, Section 1910.7 (29 CFR 1910.7). Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within its scope of recognition. Each NRTL's scope of recognition includes (1) the type of products the NRTL may test, with each type specified by its applicable test standard; and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL's scope of recognition. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The Agency processes applications by an NRTL for initial recognition, and for an expansion or renewal of this recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the Agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides its preliminary finding. In the second notice, the Agency provides its final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational Web page for each NRTL, including UL, which details the NRTL's scope of recognition. These pages are available from the OSHA Web site at <http://www.osha.gov/dts/otpca/nrtl/index.html>.

UL currently has 34 facilities (sites) recognized by OSHA for product testing and certification, with its headquarters located at: Underwriters Laboratories, Inc., 333 Pfingsten Road, Northbrook, IL 60062. A complete list of UL's scope of recognition is available at <http://www.osha.gov/dts/otpca/nrtl/ul.html>.

II. General Background on the Application

UL submitted an application, dated March 26, 2013 (see Exhibit 1), to expand its recognition to include multiple additional test standards. The Office of Technical Programs and

Coordination Activities (OTPCA) staff performed a comparability analysis and reviewed other pertinent information. OSHA did not perform any on-site reviews in relation to this application. Table 1 below lists appropriate test standards found within UL's application for expansion for testing and

certification of products under the NRTL Program. Two of these test standards, UL 66 and UL 8750, are new to the NRTL Program, and OSHA preliminarily determined that they are "appropriate test standards" within the meaning of 29 CFR 1910.7(c).

* Test standards new to the NRTL Program.

III. Preliminary Findings on the Application

OSHA's preliminary findings:
 1. UL submitted an acceptable application for expansion of its scope of recognition. OSHA's review of the application file and its comparability analysis indicate that UL can meet the requirements prescribed by 29 CFR 1910.7 for expanding its recognition to include the addition of 21 test standards for NRTL testing and certification listed above. This preliminary determination does not constitute an interim or temporary approval of UL's application.
 2. The UL 66 and UL 8750 test standards are appropriate test standards, and OSHA proposes to include these test standards in the NRTL Program's list of appropriate test standards.

OSHA welcomes public comment as to whether UL meets the requirements of 29 CFR 1910.7 for expansion of its recognition as an NRTL. OSHA also seeks comments as to whether the UL 66 and UL 8750 test standards are appropriate test standards under the NRTL Program. Comments should consist of pertinent written documents and exhibits. Commenters needing more

time to comment must submit a request in writing, stating the reasons for the request. Commenters must submit the written request for an extension by the due date for comments. OSHA will limit any extension to 10 days unless the requester justifies a longer period. OSHA may deny a request for an extension if the request is not adequately justified. To obtain or review copies of the publicly available information in UL's application, including pertinent documents (e.g., exhibits) and all submitted comments, contact the Docket Office, Room N-2625, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address; these materials also are available online at <http://www.regulations.gov> under Docket No OSHA-2009-0025.

The OTPCA staff will review all comments to the docket submitted in a timely manner and, after addressing the issues raised by these comments, will recommend to the Assistant Secretary for Occupational Safety and Health whether to grant UL's application for expansion of its scope of recognition and whether to add the two test

standards to the NRTL list of appropriate test standards. The Assistant Secretary will make the final decision on granting the application and adding the two new test standards. In making this decision, the Assistant Secretary may undertake other proceedings prescribed in Appendix A to 29 CFR 1910.7.

OSHA will publish a public notice of its final decision in the **Federal Register**.
