SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 et seq.), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 et seq.), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222–226).

The Alaska SeaLife Center (ASLC) requests a five-year permit to conduct Steller sea lion population monitoring and health, nutrition, and foraging studies to provide data on pup and juvenile survival, reproductive rates, diet, epidemiology, endocrinology, immunology, physiology, ontogenetic and annual body condition cycles, and behavior. Individual sea lions may be taken by the following means with maximum number of takes per year in parentheses: disturbance associated with capture, observational studies, and material/scat/carcass collection (14,000); capture, restraint, and sampling (200); and remote biopsy (150). Captured sea lions will undergo morphometric measurements, blood and tissue collection, digital imaging, hotbranding, body condition measurement, whisker, hair, and milk sampling, temporary marking, and ultrasound exams. Individuals will be taken from the Gulf of Alaska and Aleutian Islands. Marine mammals that may be incidentally disturbed include harbor seals (*Phoca vitulina*), sea otters (Enhydra lutris), and California sea lions (Zalophus californianus).

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), an initial determination has been made that the activities proposed are consistent with the Preferred Alternative in the Final Programmatic Environmental Impact Statement for Steller Sea Lion and Northern Fur Seal Research (NMFS 2007), and that issuance of the permit would not have a significant adverse impact on the human environment.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: April 14, 2014.
