

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under section 47503 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of section 47506 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator that submitted those maps, or with those public agencies and planning agencies with which consultation is required under section 47503 of the Act. The FAA has relied on the certification by the airport operator, under section 150.21 of FAR part 150, that the statutorily required consultation has been accomplished.

Copies of the full updated noise exposure map documentation and of the FAA's evaluation of the maps are available for examination, upon prior appointment during normal business hours, at the following locations: Indianapolis Airport Authority, 7800 Col. H. Weir Cook Memorial Drive, Indianapolis, Indiana 46241. Federal Aviation Administration, Chicago Airports District Office, 2300 E. Devon, Suite 320, Des Plaines, IL 60018.
