Cash Deposit Requirements

Effective upon publication of the final rescission of the NSR of Goodman, the Department will instruct CBP to discontinue the option of posting a bond or security in lieu of a cash deposit for entries of subject merchandise by Goodman. Cash deposits will be required for exports of subject merchandise by Goodman entered, or withdrawn from warehouse, for consumption on or after the publication date at the per-unit PRC-wide rate, \$4.71 per kilogram.

Assessment Instructions

Both the PRC separate rate and the PRC entity are under review in the 2011–2012 administrative review, which is currently being conducted,⁷ and the POR of the administrative review coincides with the POR of this NSR. Goodman has filed a separate rate application in the concurrent administrative review indicating that it is independent of Chinese government control. Therefore, we will issue liquidation instructions for Goodman's entries upon completion of the administrative review. In the final results of the administrative review, the Department will determine whether Goodman qualifies for the PRC separate rate or the PRC-wide rate. Upon completion of the administrative review, the Department will instruct U.S. Customs and Border Protection to assess antidumping duties on entries for Goodman at the appropriate rate.

Notification to Importers

This notice serves as a reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary of Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

⁷ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part*, 77 FR 77017 (December 31, 2012).

Return of Destruction of Proprietary Information

This notice serves as a reminder to parties subject to the administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under the APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This notice is issued and published in accordance with sections 751(a)(2)(B) and 777(i) of the Act, and 19 CFR 351.214.

Dated: April 3, 2014.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new information collection.

Marine recreational anglers are surveyed to collect catch and effort data, fish biology data, and angler socioeconomic characteristics. These data are required to carry out provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.), as amended, regarding conservation and management of fishery resources.

Marine recreational fishing catch and effort data are collected through a combination of mail surveys, telephone surveys and on-site intercept surveys with recreational anglers. Amendments to the Magnuson-Stevens Fishery Conservation and Management Act (MSA) require the development of an improved data collection program for recreational fisheries. To meet these requirements, NOAA Fisheries has designed and tested new approaches for sampling and surveying recreational anglers.

A mail survey of all anglers within a household will be used to collect recent fishing effort data including gear and methods of fishing from shore. The main purpose will be to compare to on-site roving counts of shore fishing effort during the same period and to produce adjustment factors for under-coverage of the roving on-site survey (the roving effort survey does not require response from the public). The survey scope is Oahu, during a single 2-month sampling wave (current schedule July–Aug, 2014). The effort surveys will use catch data from the ongoing shore angler intercept survey to produce estimates of total catch, harvested catch, and live released catch.

II. Method of Collection

Information will be collected through mail surveys.
