SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: This supporting statement addresses information collection activities imposed by the Sewage Sludge Incineration (SSI) Unit Emission Guidelines Subpart M. The guidelines do not apply directly to SSI unit owners and operators. The guidelines can be thought of as model regulations that States use in developing State plans to implement the emission guidelines. If a State does not develop, adopt, and submit an approvable State plan, the Environmental Protection Agency (EPA) must develop a Federal plan to implement the emission guidelines. This ICR presents the burden to respondents (owners or operators of SSI units) and the Designated Administrator (State or Federal Government) that will be imposed by State plans developed to implement the emission guidelines. Respondents are owners or operators of existing SSI units, including fluidized bed or multiple hearth units.

Form Numbers: None.

Respondents/affected entities:

Owners and operators of sewage sludge incinerators.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart M). (40 CFR part 60, subpart M).

Estimated number of respondents: 110 (total).

Frequency of response: Initially, semiannually, and annually.

Total estimated burden: 29,116 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$7,580,390 (per year), which includes \$4,732,368 annualized capital and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in the total estimated respondent burden compared with the ICR currently approved by

OMB. The decrease occurred because the standard has been in effect for more than three years and the requirements are different during initial compliance as compared to on-going compliance. The previous ICR reflected those burdens and costs associated with the initial activities for subject facilities. This includes purchasing monitoring equipment, conducting performance test(s) and establishing recordkeeping systems. This ICR, by in large, reflects the on-going burden and costs which include continuously monitoring of pollutants and the submission of annual reports. However, note there is an adjustment increase in the total respondent costs due to an increase in labor rates.

In addition, there is a slight increase in the Agency cost due to a correction in travel expense. This ICR corrects the number of hours required for observing each stack test from 30 hours to 48 hours.

Richard T. Westlund,

Acting Director, Collection Strategies Division.
