Take notice that on April 11, 2014, Pivotal LNG, Inc. (Pivotal LNG), pursuant to section 207(a)(2) of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.207 (2013), filed a Petition for Declaratory Order seeking a declaratory ruling from the Commission that certain existing liquefied natural gas ("LNG") production facilities ("LNG production Facilities"), not otherwise subject to the Commission's jurisdiction under Section 3 of the Natural Gas Act ("NGA"), 15 U.S.C. 717b (2012), would not be deemed "LNG terminal[s]," as that term is defined in Section 2(11) of the NGA, *id.* 717a(11), by virtue of producing LNG that subsequently may be transported in interstate commerce by waterborne vessel. Also, the Petition seeks a finding that certain proposed LNG transactions wherein Pivotal LNG sells LNG that is: (i) Sourced from one of the LNG Production Facilities or from

a non-affiliated LNG supplier; (ii) transported by Pivotal LNG, an affiliate, or a third party in intrastate or interstate commerce within the contiguous United States by means including (but not limited to) truck, rail, or waterborne vessel, but excluding interstate pipeline; and (iii) subsequently transported by a third party in interstate commerce, by waterborne vessel, for resale and ultimate consumption in a non-contiguous U.S. state or territory as vehicular fuel, other end-use fuel, or feedstock do not constitute jurisdictional sales or transportation of natural gas in interstate commerce subject to the Commission's jurisdiction under NGA Sections 1(b) and 7, *id.* 717(b), 717f.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). This is a proposed extension of the ICR, which is currently-approved through May 31, 2014. Public comments were previously requested via the **Federal Register** (78 FR 35023) on June 11, 2013 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: This supporting statement addresses information collection activities imposed by the Sewage Sludge Incineration (SSI) Unit Emission Guidelines Subpart M. The guidelines do not apply directly to SSI unit owners and operators. The guidelines can be thought of as model regulations that States use in developing State plans to implement the emission guidelines. If a State does not develop, adopt, and submit an approvable State plan, the Environmental Protection Agency (EPA) must develop a Federal plan to implement the emission guidelines. This ICR presents the burden to respondents (owners or operators of SSI units) and the Designated Administrator (State or Federal Government) that will be imposed by State plans developed to implement the emission guidelines. Respondents are owners or operators of existing SSI units, including fluidized bed or multiple hearth units.

Form Numbers: None.

Respondents/affected entities:

Owners and operators of sewage sludge incinerators.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart M). (40 CFR part 60, subpart M).

Estimated number of respondents: 110 (total).

Frequency of response: Initially, semiannually, and annually.

Total estimated burden: 29,116 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$7,580,390 (per year), which includes \$4,732,368 annualized capital and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in the total estimated respondent burden compared with the ICR currently approved by

OMB. The decrease occurred because the standard has been in effect for more than three years and the requirements are different during initial compliance as compared to on-going compliance. The previous ICR reflected those burdens and costs associated with the initial activities for subject facilities. This includes purchasing monitoring equipment, conducting performance test(s) and establishing recordkeeping systems. This ICR, by in large, reflects the on-going burden and costs which include continuously monitoring of pollutants and the submission of annual reports. However, note there is an adjustment increase in the total respondent costs due to an increase in labor rates.

In addition, there is a slight increase in the Agency cost due to a correction in travel expense. This ICR corrects the number of hours required for observing each stack test from 30 hours to 48 hours.

Richard T. Westlund,

Acting Director, Collection Strategies Division.
