SUPPLEMENTARY INFORMATION: This notice announces the Department of Commerce's proposal for a new system of records under the Privacy Act of 1974 for BUSA.

The BUSA IHSA SSR is a new system that manages the customer-to-resource interaction. It connects customers with programs, resources, data, points of contact, and other relevant information to help businesses grow. BUSA makes it easier for businesses to find the answers and assistance they need quickly through a multi-channel approach (including contact center, Web site, email and social media) that is facilitated by BUSA's Intellectual Hosting Service Application and Satisfaction Survey Records. BUSA serves as a central point of contact to exchange information among Federal, state, regional and local entities involved in the provision of business enterprise assistance. BUSA aims to provide a single customer experience for America's businesses when entering the Federal gateway by removing the redundancy of multiple contacts and access to difference Federal resource areas, while ensuring customers are properly referred to best suited resources in a timely manner.

BUSA will ensure a safe and secure environment for America's businesses by providing security controls and privacy that will enable integrity, availability and confidentiality. BUSA will sustain a comprehensive framework that provides ubiquitous access to government information and services to help grow American businesses. BUSA will: (a) Capture key business characteristics from U.S. small businesses and exporters; and (b) capture resource summary information and relevant point of contact from resource providers and local business assistance organizations. This information will be used to make informed referrals to appropriate resource providers, business assistance organizations and programs. BUSA will analyze trends and solicit feedback from the businesses about what programs and services they find most valuable and their preferred delivery mechanisms. BUSA will use business community feedback to provide business intelligence solutions for evolving technology to improve business customers' request and experience with the Federal government.

This new system of records will be accessible only to BUSA internal staff, BUSA Federal partner agencies and bureaus, and cloud-based solution provider. Information will be disclosed on a need to know basis. The system of records may be accessible on a limited basis to resource providers and local business assistance organizations. The system of records is designed to record: (1) Customer biographical information (see Categories of Individuals Covered by the System); (2) business resource summary information and relevant points of contact (see Categories of Individuals Covered by the System); (3) referrals to Federal partner programs, resources, data, and other relevant business-focused information; and (4) customer responses to service satisfaction. Information collected in this system of records is basic, non-proprietary business and biographical information. Information collected is used to match customer inquiry and/or request with best resource available. No private or proprietary data will be collected and/or stored by this system.
