

A. Federal Reserve Bank of Minneapolis (Jacquelyn K. Brunmeier, Assistant Vice President) 90 Hennepin Avenue, Minneapolis, Minnesota 55480-0291:

1. *Scott David Bormann, Douglas Lee Bormann, both of Parkston, South Dakota, and Shirley Jean Altenhofen, Harper, Iowa, individually and as trustees of the Bormann Family Trust, Parkston, South Dakota; to retain voting shares of Parkston Investment Company, and thereby indirectly retain voting shares of Farmers State Bank, both in Parkston, South Dakota.*

In addition, *the Bormann Family Trust, James D. Bormann, Parkston, South Dakota, Angela Marie Bormann, Sioux Falls, South Dakota, and Michael Aaron Bormann, Parkston, South Dakota, all to become members of the Bormann Family Shareholders Group, and retain voting shares of Parkston Investment Company, and thereby indirectly retain voting shares of Farmers State Bank, both in Parkston, South Dakota.*

B. Federal Reserve Bank of Dallas (E. Ann Worthy, Vice President) 2200 North Pearl Street, Dallas, Texas 75201-2272:

1. *Barkat Ali, Southlake, Texas; to acquire voting shares of Riverbend Financial Corporation, and thereby indirectly acquire voting shares of Riverbend Bank, both in Fort Worth, Texas.*

Board of Governors of the Federal Reserve System, May 13, 2014.

Michael J. Lewandowski,

Associate Secretary of the Board.

BILLING CODE 6210-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Preparedness and Response Science Board (Previously Known as the "National Biodefense Science Board") Call for Nominees

AGENCY: Office of the Secretary, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The Office of the Secretary is accepting application submissions from qualified individuals who wish to be considered for membership on the National Preparedness and Response Science Board (NPRSB), previously known as the National Biodefense Science Board; seven members have membership expiration dates of December 31, 2014; therefore, seven new voting members will be selected for

the Board. Nominees are being accepted in the following categories: Industry, academia, practicing healthcare, pediatrics, and organizations representing other appropriate stakeholders. Please visit the NPRSB Web site at www.phe.gov/nprsb for all application submission information and instructions. All members of the public are encouraged to apply.

DATES: The deadline for all application submissions is June 15, 2014, at 11:59 p.m.

FOR FURTHER INFORMATION CONTACT: Please submit any inquiries to CAPT Charlotte Spires, DVM, MPH, DACVPM, Executive Director and Designated Federal Official, National Preparedness and Response Science Board, Office of the Assistant Secretary for Preparedness and Response, U.S. Department of Health and Human Services, Thomas P. O'Neill Federal Building, Room number 14F18, 200 C St. SW., Washington, DC 20024; Office: 202-260-0627, Email address: charlotte.spires@hhs.gov.

SUPPLEMENTARY INFORMATION: The NPRSB is authorized under Section 319M of the Public Health Service (PHS) Act (42 U.S.C. 247d-7f) as added by Section 402 of the Pandemic and All-Hazards Preparedness Act (PAHPA) of 2006 and amended by Section 404 of the Pandemic and All Hazards Preparedness Reauthorization Act and Section 222 of the PHS Act (42 U.S.C. 217a). The Board provides expert advice and guidance to the Secretary on scientific, technical, and other matters of special interest to the Department of Health and Human Services regarding current and future chemical, biological, nuclear, and radiological agents, whether naturally occurring, accidental, or deliberate. The Board also provides advice and guidance to the Secretary and/or the Assistant Secretary for Preparedness and Response (ASPR) on other matters related to public health emergency preparedness and response.

Description of Duties: The Board shall advise the Secretary and/or ASPR on current and future trends, challenges, and opportunities presented by advances in biological and life sciences, biotechnology, and genetic engineering with respect to threats posed by naturally occurring infectious diseases and chemical, biological, radiological, and nuclear agents. At the request of the Secretary and/or ASPR, the Board shall review and consider any information and findings received from the working groups established under 42 U.S.C. 247d-7f(b). At the request of the Secretary and/or ASPR, the Board shall provide recommendations and findings for expanded, intensified, and

coordinated biodefense research and development activities. The Board shall also provide any recommendation, finding, or report provided to the Secretary on these matters to the appropriate committees of Congress. Additional advisory duties concerning public health emergency preparedness and response may be assigned at the discretion of the Secretary and/or ASPR.

Structure: The Board shall consist of 13 voting members, including the Chairperson; additionally, there may be non-voting ex officio members. Pursuant to 42 U.S.C. 247d-7f(a), members and the Chairperson shall be appointed by the Secretary from among the nation's preeminent scientific, public health, and medical experts as follows: (a) Such federal officials as the Secretary determines are necessary to support the functions of the Board; (b) four individuals from the pharmaceutical, biotechnology, and device industries; (c) four individuals representing academia; and (d) five other members as determined appropriate by the Secretary, one of whom must be a practicing health care professional; one of whom shall be an individual from an organization representing health care consumers; one of whom shall be an individual with pediatric subject matter expertise; and one of whom shall be a state, tribal, territorial, or local public health official. Nothing in the membership requirements shall preclude a member of the Board from satisfying two or more of these requirements described in item (d). A member of the Board described in (b), (c), and (d) shall serve for a term of three years, and may serve not more than two consecutive terms.

Members who are not full-time or permanent part-time federal employees shall be appointed by the Secretary as Special Government Employees.

Dated: May 8, 2014.

Nicole Lurie,

Assistant Secretary for Preparedness and Response.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-14-0879]

Proposed Data Collections Submitted for Public Comment and Recommendations

The Centers for Disease Control and Prevention (CDC), as part of its

continuing effort to reduce public burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. To request more information on the below proposed project or to obtain a copy of the information collection plan and instruments, call 404-639-7570 or send comments to LeRoy Richardson, 1600 Clifton Road, MS-D74, Atlanta, GA 30333 or send an email to omb@cdc.gov.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget (OMB) approval. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing

and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information. Written comments should be received within 60 days of this notice.

Proposed Project

Surveys of State, Tribal, Local, and Territorial (STLT) Governmental Agencies (OMB Control No. 0920-0879, Exp. 4/30/2017)—Revision—Office of the Director, Office for State, Tribal Local and Territorial Support (OSTLTS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The mission of the Department of Health and Human Services is to help provide the building blocks that Americans need to live healthy, successful lives. As part of HHS, CDC's mission is to create the expertise, information, and tools that people and communities need to protect their health—through health promotion, prevention of disease, injury and disability, and preparedness for new health threats. CDC and HHS seek to accomplish its mission by collaborating with partners throughout the nation and the world to: Monitor health, detect and investigate health problems, conduct research to enhance prevention, develop and advocate sound public health policies, implement prevention strategies, promote healthy behaviors, foster safe and healthful environments, and provide leadership and training.

CDC is requesting a three-year approval for a generic clearance to collect information related to domestic public health issues and services that affect and/or involve state, tribal, local and territorial (STLT) government

entities. HHS, specifically the Office of the Assistant Secretary for Planning and Evaluation (ASPE), will be a new user for this generic clearance.

The respondent universe is comprised of STLT governmental staff or delegates acting on behalf of a STLT agency involved in the provision of essential public health services in the United States. Delegate is defined as a governmental or non-governmental agent (agency, function, office or individual) acting for a principal or submitted by another to represent or act on their behalf. The STLT agency is represented by a STLT entity or delegate with a task to protect and/or improve the public's health.

Information will be used to assess situational awareness of current public health emergencies; make decisions that affect planning, response and recovery activities of subsequent emergencies; fill CDC and HHS gaps in knowledge of programs and/or STLT governments that will strengthen surveillance, epidemiology, and laboratory science; improve CDC's support and technical assistance to states and communities. CDC and HHS will conduct brief data collections, across a range of public health topics related to essential public health services.

CDC estimates up to 30 data collections with STLT governmental staff or delegates, and 10 data collections with local/county/city governmental staff or delegates will be conducted on an annual basis. It is also estimated that HHS/ASPE may submit up to three data collections with STLT governmental or staff delegates annually. Ninety-five percent of these data collections will be Web-based and five percent telephone, in-person, and focus groups. The total annualized burden of 54,000 hours is based on the following estimates.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent type	Average burden per respondent (in hours)	Total burden hours
State, Territorial, or Tribal government staff or delegate.	Web, telephone, in-person, focus group.	800	30	1	24,000
Local/County/City government staff or delegate.	Web, telephone, in-person, focus group.	3,000	10	1	30,000
Total	54,000

Proposed Project

Virtual Reality to Train and Assess Emergency Responders (OMB No. 0920-0975, expires 07/31/2016)—Revision—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

NIOSH, under Public Law 91-173 as amended by Public Law 95-164 (Federal Mine Safety and Health Act of 1977), and Public Law 109-236 (Mine Improvement and New Emergency Response Act of 2006) has the responsibility to conduct research to improve working conditions and to prevent accidents and occupational diseases in underground coal and metal/nonmetal mines in the U.S.

The turn of the 21st century started with much promise for the coal mining industry. Because there was only one underground disaster in the 1990s, it seemed that emergency response in the United States no longer needed to be a top research priority. However, major coal mine disasters between 2001 and 2010 have resulted in 65 fatalities. These events highlighted the critical need to balance investments to reduce low probability/high severity events with those that focus on frequent, but less severe injuries and illnesses.

The present research project seeks to determine optimal use of virtual reality (VR) technologies for training and assessing mine emergency responders using the Mine Rescue and Escape Training Laboratory (MRET Lab). Responders include specially trained individuals, such as mine rescue or fire brigade team members, and also managers and miners who may either be called upon to respond to an emergency situation or engage in self-protective actions in response to an emergency. This project is a step toward determining how new immersive virtual reality technologies should be used for miner training and testing in the US.

The project objective will be achieved through specific aims in two related areas as illustrated below.

Training Assessment

1. Evaluate four training modules.

2. Evaluate participant reactions.
3. Develop guidelines.

Training Development

4. Use 3D technologies to develop a prototype for a mine rescue closed-circuit breathing apparatus (e.g., Dräger BG4).

To accomplish these goals over the life of the project, researchers will utilize a variety of data collection strategies, including self-report pre- and post-test instruments for assessing trainee reaction and measuring learning. Data collection will take place with approximately 210 underground coal miners over three years. The respondents targeted for this study include rank-and-file miners, mine rescue team members, and mine safety and health professionals. A sample of 210 individuals will be collected from various mining operations and mine rescue teams which have agreed to participate. All participants will be between the ages of 18 and 65, currently employed, and living in the United States. Findings will be used to improve the safety and health of underground coal miners by assessing the efficacy of immersive VR environments for teaching critical mine safety and health skills.

To assess learning as a result of training, each participant will complete a pre-training questionnaire, a post-simulation questionnaire, and a post-training questionnaire. Participants evaluating the closed-circuit breathing apparatus training will only complete a version of the pre-training questionnaire. There is no cost to respondents other than their time.

As stated previously in the previously approved information collection request, research activities involving rank-and-file underground coal miners who participate in the mine escape training may occur at either the MRET Lab or in an off-site classroom or other typical instructional setting either at an above-ground mine safety training facility, mine administration building, or a university or academic environment (hereinto referenced as the "classroom setting"). Having these two subsamples allows us to better assess uses for VR training applications, determine the potential additive value of training provided in the MRET Lab, and the potential benefits of adapting simulation-based mine emergency training to a broader audience. To accommodate an appropriate amount of mine escape participants for both the MRET Lab modules and classroom settings, we are requesting a revision in order to add 60 more participants to our 150 participant data collection cap,
