Information Collection Request Title: Federalwide Assurance Form, Assistant Secretary for Health, Office for Human Research Protections.

OMB No.: 0990-0278.

Abstract: The Office for Human Research Protections is requesting a three year extension of the Federalwide Assurance (FWA). The FWA is designed to provide a simplified procedure for institutions engaged in HHS-conducted or supported research to satisfy the assurance requirements of Section 491(a) of the Public Health Service Act and HHS Regulations for the protection of human subjects at 45 CFR 46.103. The respondents are institutions engaged in human subjects research that is conducted or supported by HHS.

Need and Proposed Use of the Information: The information collected by OHRP through the FWA is the minimum necessary to satisfy the assurance requirements of the Public Health Service Act and the requirements of HHS regulations at 45 CFR 46.103.

Likely Respondents: Research institutions engaged in HHS-conducted or -supported research involving human subjects.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions, to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information, to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information, and to transmit or otherwise disclose the

information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
Federalwide assurance (FWA)	11,050	2	30/60	11,050
Total	11,050

SUPPLEMENTARY INFORMATION:

Proposed Project

Evaluation of the Implementation of TeamSTEPPS in Primary Care Settings (ITS-PC)

As part of its effort to fulfill its mission goals, AHRQ, in collaboration with the Department of Defense’s (DoD) Tricare Management Activity (TMA), developed TeamSTEPPS® (aka, Team Strategies and Tools for Enhancing Performance and Patient Safety) to provide an evidence-based suite of tools and strategies for training teamwork-based patient safety to health care professionals. TeamSTEPPS includes multiple toolkits which are all tied to or are variants of the core curriculum. In addition to the core curriculum, TeamSTEPPS resources have been developed for primary care, rapid response systems, long-term care, and patients with limited English proficiency.

The main objective of the TeamSTEPPS program is to improve patient safety by training health care staff in various teamwork, communication, and patient safety concepts, tools, and techniques and ultimately helping to build national capacity for supporting teamwork-based patient safety efforts in health care organizations. Since 2007, AHRQ’s National Implementation Program has produced (and continues to produce) Master Trainers who have stimulated the use and adoption of TeamSTEPPS in health care delivery systems. These individuals were trained using the TeamSTEPPS core curriculum at regional training centers across the U.S. AHRQ has also provided technical assistance and consultation on implementing TeamSTEPPS and has developed various channels of learning (e.g., user networks, various educational venues) for continued support and the improvement of teamwork in health care. Since the inception of the National Implementation Program, AHRQ has trained more than 5,000 participants to serve as TeamSTEPPS Master Trainers.

Given the success of the National Implementation Program, AHRQ

launched an effort to provide TeamSTEPPS training to primary care health professionals using the *TeamSTEPPS in Primary Care* version of the curriculum. Most of the participants in the current National Implementation Program’s training come from hospital settings, because the TeamSTEPPS core curriculum is most aligned with that context. Under this new initiative, primary care practice facilitators will be trained through a combination of in-person and online training. Upon completion of the course, these individuals will be Master Trainers who will (a) train the staff at primary care practices, and (b) implement or support the implementation of TeamSTEPPS tools and strategies in primary care practices.

As part of this initiative, AHRQ seeks to conduct an evaluation of the *TeamSTEPPS in Primary Care* training program. This evaluation seeks to understand the effectiveness of the *TeamSTEPPS in Primary Care* training and how trained practice facilitators implement TeamSTEPPS in primary care practices.

This research has the following goals:

- (1) Conduct a formative assessment of the *TeamSTEPPS for Primary Care* training program to determine what revisions and improvement should be made to the training and how it is delivered, and
- (2) Identify how trained participants use and implement the *TeamSTEPPS* tools and resources in primary care settings.

This study is being conducted by AHRQ through its contractor, the Health Research and Education Trust (HRET) and HRET’s subcontractor, IMPAQ International, pursuant to AHRQ’s statutory authority to conduct and support research on healthcare and on systems for the delivery of such care, including activities with respect to the quality, effectiveness, efficiency, appropriateness and value of healthcare services and with respect to quality measurement and improvement. 42 U.S.C. 299a(a)(1) and (2).
