I. Abstract

The Special American Business Internship Training (SABIT) Program of the Department of Commerce's International Trade Administration (ITA), is a key element in the U.S. Government's efforts to support the economic transition of Eurasia (the former Soviet Union) and to support economic growth in other regions of the world, including Pakistan and the Middle East, et al. SABIT develops and implements two to three week training programs for groups of up to 20 business and government professionals from Eurasia and other regions. These professionals meet with U.S. government agencies, non-governmental organizations and companies in order to learn about various business practices and principles. This unique private sector-U.S. Government partnership was created in order to tap into the U.S. private sector's expertise and to assist developing regions in their transition to market-based economies while simultaneously boosting trade between the United States and other countries. Participant applications are needed to enable SABIT to find the most qualified participants for the training programs. Participant exit questionnaires provide insight as to what the participants have learned, and they are used to improve the content and administration of future programs. Alumni success story reports track the success of the program as regards to business ties between the U.S. and the countries SABIT covers.

The closing date for participant applications is based upon the starting date of the program and is published with the application, on the program's English-language Web site at www.trade.gov/sabit, and also on the Russian-language Web site at www.sabitprogram.org, if applicable. Pursuant to section 632(a) of the Foreign Assistance Act of 1961, as amended, funding for the programs will be provided by the Agency for International Development (AID).

The SABIT Program propose to revise the collection instruments. The instruments are very similar to those used by SABIT in past years. However, some wording has been changed to reflect the changing needs of SABIT over time. The changes are relatively minor and most of them are rephrasing of wording. Two questions have been

added to the Participant Exit Questionnaire; and instructions for filling out the form, methods of submission, and the order of questions have been revised on the Participant Application. These revisions are not expected to increase the response time to complete the instruments.

II. Method of Collection

Participant applications are available for download from the SABIT English and Russian language Web sites at www.trade.gov/sabit and www.sabitprogram.org. Applications may be sent to program candidates via email, facsimile, or mail upon request. Applications are collected primarily via email, but are also accepted by mail or fax. Participant exit questionnaires are given to program participants at the completion of programs in person on paper or by email and are collected in paper format or by email. Alumni success story reports are used internally by SABIT staff to record success information, but at times they may be sent to alumni to fill out and submit via email or fax.

SUPPLEMENTARY INFORMATION:

I. Abstract

Regulations at 50 CFR 665, Subpart C, require that all participants (including vessel owners, operators, and crew) in the boat-based non-commercial bottomfish fishery in the Exclusive Economic Zone around the main Hawaiian Islands obtain a federal bottomfish permit. This collection of information is needed for permit issuance, to identify actual or potential participants in the fishery, determine

qualifications for permits, and to help measure the impacts of management controls on the participants in the fishery. The permit program is also an effective tool in the enforcement of fishery regulations and serves as a link between the National Marine Fisheries Service (NMFS) and fishermen.

Regulations at 50 CFR 665 require that all vessel owners or operators in this fishery are required to submit a completed logbook form at the completion of each fishing trip. These logbook reporting sheets document the species and amount of species caught during the trip. The reporting requirements are crucial to ensure that NMFS and the Western Pacific Fishery Management Council (Council) will be able to monitor the fishery and have fishery-dependent information to develop an Annual Catch Limit for the fishery, evaluate the effectiveness of management measures, determine whether changes in fishery management programs are necessary, and estimate the impacts and implications of alternative management measures.
