II. Background

The Safe Drinking Water Act (SDWA) requires the EPA to promulgate rules establishing criteria for a monitoring program for unregulated contaminants in drinking water. Monitoring varies based on system size, source water, and contaminants likely to be found. SDWA also specifies that for systems serving 10,000 persons or fewer, only a representative sample of systems must monitor. Per SDWA, EPA is required to issue, every five years, a list of not more than 30 unregulated contaminants to be monitored by public water systems. The third and most recent rule (UCMR 3) was published on May 2, 2012. The fourth (UCMR 4) is scheduled to be published by December 2016.

Dated: May 20, 2014.

Synopsis

1. By this document we seek comment on a proposal filed by the National Association of Broadcasters (NAB) that would relax but not eliminate § 90.242(b)(8) of the Commission's rules, 47 CFR. 90.242(b)(8). This rule section requires the filtering of Travelers' Information Stations (TIS) audio frequencies between 3 and 20 kHz. NAB filed its proposal by way of reply comments to a Further Notice of Proposed Rulemaking (FNPRM), which proposed elimination of § 90.242(b)(8).

I. Background

2. Following the Commission's adoption of a 2010 Notice of Proposed Rulemaking (NPRM) that sought comment on various TIS issues, numerous commenters asserted that the TIS filtering requirement decreases the audibility of TIS broadcasts, especially at night and over difficult terrain. Because the filtering issue was not raised in the NPRM but rather was introduced for the first time by commenters in the record, the Commission sought further comment on the issue in the FNPRM, asking whether this requirement should be eliminated. The Commission received nine comments and four reply comments in response to the FNPRM. All commenters, save two, support elimination of the filtering requirement. In addition, many commenters, while supporting this elimination, oppose any mandates to require filter removal or to recertify TIS transmitters as a result of the filter removal.

3. The Society of Broadcast Engineers (SBE) and NAB submitted comments opposing removal of the TIS filtering restriction. SBE states that "[w]hile it is correct that removal of the filtering . . . would improve the audio quality of a TIS transmission, this would be accomplished by a secondary spectrum user at the cost of harmful interference to adjacent channel AM Broadcast station reception."

4. Although NAB submitted comments opposing removal of the filtering requirement, it also noted that "a compromise approach may be workable." Specifically, NAB states that "a filter capable of filtering audio frequencies above 5 kHz should allow for a TIS signal of sufficiently higher quality, without impeding neighboring AM services." NAB notes that "full-power AM radio stations routinely use 5 kHz filters to address and prevent interference among AM stations, with few significant problems." NAB tempers
