NMFS issues permits based on findings that such permits: (1) Are applied for in good faith; (2) if granted and exercised, would not operate to the disadvantage of the listed species that are the subject of the permit; and (3) are consistent with the purposes and policy of section 2 of the ESA. The authority to take listed species is subject to conditions set forth in the permits.

Anyone requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). Such hearings are held at the discretion of the Assistant Administrator for Fisheries, NMFS.

Applications Received

Permit 18792

The Wild Fish Conservancy (WFC) is seeking a five-year permit to annually take juvenile PS Chinook salmon and subadult PS steelhead. The WFC research may also cause them to take Southern eulachon, a species for which there are currently no ESA take prohibitions. The purpose of the study is to test native salmonids for pathogens transmitted from salmon in net pens in the Puget Sound. The research would benefit the affected species by (1) determining the direction and distance potential pathogen plumes could move and thereby help managers place net pens where they would do the least amount of harm to native fishes, and (2) identifying areas where such plumes may affect salmonids. Sampling would take place in two locations in Puget Sound: Clam Bay (South Puget Sound) and Deepwater Bay (Whidbey Basin). The WFC proposes to use beach seines to capture fish twice each month at multiple sites near both locations. The
