Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Atlantis California Current Ecosystem Model will be reviewed by a panel composed of representatives from the Pacific Fishery Management Council's (Pacific Council) Scientific and Statistical Committee, the Center for Independent Experts, and NMFS. The review session is open to the public.

DATES: The review session will begin at 9 a.m. each day, from Monday, June 30 to Wednesday, July 2, 2014, and continue each day until business is concluded.

ADDRESSES: The review session will be held at the NOAA Northwest Fisheries Science Center Auditorium, 2725 Montlake Blvd. E., Seattle, WA 98112; telephone: (206) 860-3200.

SUPPLEMENTARY INFORMATION: The purpose of the session is to evaluate the strengths, weaknesses, appropriate uses, and potential areas of improvement for the Atlantis model with respect to the Pacific Council's management needs, in the context of ecosystem-based management. Reviewers will be asked to comment on the technical merits and/or deficiencies of the methodology and make recommendations for remedies. The review will follow the Methodology Review Process established by the Pacific Council, and Terms of Reference developed for this review.

Although non-emergency issues not contained in the meeting agenda may come before the panel participants for discussion, those issues may not be the subject of formal panel action during this meeting. Panel action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens

Fishery Conservation and Management Act, provided the public has been notified of the panel participants' intent to take final action to address the emergency.

All visitors to the NMFS science centers should bring photo identification to the meeting location. Visitors who are foreign nationals (defined as a person who is not a citizen or national of the United States) will require additional security clearance to access the NOAA facilities. Foreign national visitors should contact Jim Herkelrath at (206) 860-6798 at least two weeks prior to the meeting date to initiate the security clearance process.

Special Accommodations

This session is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt at (503) 820-2425 at least 5 days prior to the meeting date.

Dated: June 4, 2014.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Fisheries of the South Atlantic; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 41 pre Data Workshop webinar.

SUMMARY: The SEDAR 41 assessments of the South Atlantic stocks of red snapper and gray triggerfish will consist of a series of workshops and webinars: a Data Workshop; a series of Assessment webinars; and a Review Workshop. This notice is for a webinar associated with the Data portion of the SEDAR process. See **SUPPLEMENTARY INFORMATION**.

DATES: A SEDAR 41 pre Data Workshop webinar will be held on Wednesday, July 2, 2014, from 9 a.m. until 1 p.m. The established times may be adjusted as necessary to accommodate the timely completion of discussion relevant to the assessment process. Such adjustments may result in the meeting being extended from, or completed prior to the time established by this notice.

ADDRESSES:

Meeting address: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julia Byrd at SEDAR (see **FOR FURTHER INFORMATION CONTACT** below) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

SEDAR address: 4055 Faber Place Drive, Suite 201, N. Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Julia Byrd, SEDAR Coordinator; telephone: (843) 571-4366; email: julia.byrd@safmc.net.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants include: Data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion in the pre Data Workshop webinar are as follows:

Participants will present summary data and discuss data needs and treatments.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

This meeting is accessible to people with disabilities. Requests for auxiliary aids should be directed to the SEDAR office (see **ADDRESSES**) at least 10 business days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 4, 2014.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Taking and Importing Marine Mammals; Taking Marine Mammals Incidental to Missile Launch Activities at San Nicolas Island, CA

AGENCY: National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce.

ACTION: Notice of issuance of a Letter of Authorization.

SUMMARY: In accordance with the Marine Mammal Protection Act (MMPA), as amended, and implementing regulations, notification is hereby given that a letter of authorization (LOA) has been issued to the Naval Air Warfare Center Weapons Division, U.S. Navy (Navy), to take three species of seals and sea lions incidental to missile launch operations at San Nicolas Island (SNI), California, a military readiness activity.

DATES: Effective June 3, 2014, through June 3, 2019.

ADDRESSES: The LOA and supporting documentation are available for review on the Internet at: <http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications>.

Documents cited in this notice may be viewed, by appointment, during regular business hours, at the aforementioned address and at the West Coast Regional Office, NMFS, 501 West Ocean Boulevard, Suite 4200, Long Beach, CA 90802.

FOR FURTHER INFORMATION CONTACT: John Fiorentino, Office of Protected Resources, NMFS, 301-427-8401, or Monica DeAngelis, NMFS, 562-980-3232.

SUPPLEMENTARY INFORMATION:

Background

Section 101(a)(5)(A) of the MMPA (16 U.S.C. 1361 *et seq.*) directs NMFS to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and regulations are issued. However, for military readiness activities, the National Defense Authorization Act (Pub. L. 108-136) removed the “small numbers” and “specified geographical region” limitations. Under the MMPA, the term “take” means to harass, hunt, capture, or kill, or to attempt to harass, hunt, capture, or kill marine mammals.

Authorization may be granted for periods up to 5 years if NMFS finds, after notification and opportunity for public comment, that the taking will have a negligible impact on the species or stock(s) of marine mammals and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant). In addition, NMFS must prescribe regulations that include permissible methods of taking and other means of effecting the least practicable adverse impact on the species and its habitat and on the availability of the species for subsistence uses, paying particular attention to rookeries, mating grounds, and areas of similar significance. The regulations must include requirements for monitoring and reporting of such taking.

Regulations governing the taking of northern elephant seals (*Mirounga angustirostris*), Pacific harbor seals (*Phoca vitulina richardsi*), and California sea lions (*Zalophus californianus*), by harassment, incidental to missile launch operations

at SNI, were issued on June 9, 2014 and are effective June 3, 2014, through June 3, 2019. For detailed information on this action, please refer to that document. The regulations include mitigation, monitoring, and reporting requirements for the incidental take of marine mammals during missile launches at SNI.

This LOA is effective from June 3, 2014, through June 3, 2019, and authorizes the incidental take of the three marine mammal species listed above that may result from missile launch activities at SNI.

These activities may result in take, by Level B harassment, of marine mammals. In summary, potential effects of the specified activity on marine mammals involve both acoustic and non-acoustic effects. Acoustic effects are related to sound produced by the engines of all launch vehicles, and, in some cases, their booster rockets. Potential non-acoustic effects could result from the physical presence of personnel during placement of video and acoustical monitoring equipment. However, careful deployment of monitoring equipment is not expected to result in any disturbance to pinnipeds hauled out nearby. Any visual disturbance caused by passage of a vehicle overhead is likely to be minor and brief as the launch vehicles are relatively small and move at great speed. Detailed information on each potential effect (acoustic impacts, behavioral reactions of pinnipeds to missile launches, stampede-related injury or mortality from missile launches) is provided in the final rule.

Take of marine mammals will be minimized through the implementation of the following mitigation measures, provided that doing so will not compromise operational safety, human safety, national security, or other requirements or mission goals:

- (1) Limit activities near the beaches in advance of launches;
- (2) Avoid launch activities during harbor seal pupping season (February through April);
- (3) Limit launch activities during other pinniped pupping seasons;
- (4) Not launch missiles from the Alpha Complex at low elevation (less than 305 m) on launch azimuths that pass close to pinniped haul-out sites when occupied;
- (5) Avoid launching multiple missiles in quick succession over haul-out sites, especially when young pups are present;
- (6) Limit launch activities during nighttime hours, except when required by mission objectives;
