RIN 1018-AY50

Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for the New Mexico Meadow Jumping Mouse Throughout Its Range

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), determine endangered species status under the Endangered Species Act of 1973 (Act), as amended, for the New Mexico meadow jumping mouse (*Zapus hudsonius luteus*) found in Arizona, New Mexico, and Colorado. The effect of this regulation will be to add this species to the List of Endangered and Threatened Wildlife. We have also determined that critical habitat for the New Mexico meadow jumping mouse is prudent and determinable and will soon publish in the **Federal Register** our final designation of critical habitat for the New Mexico meadow jumping mouse.

DATES: This rule becomes effective July 10, 2014.

ADDRESSES: This final rule is available on the internet at <http://www.fws.gov/southwest/es/NewMexico/index.cfm>, and <http://www.regulations.gov> at Docket No. FWS-R2-ES-2013-0023. SUPPLEMENTARY INFORMATION:

Executive Summary

Why we need to publish a rule. Under the Act, a species or subspecies may warrant protection through listing if it is endangered or threatened throughout all or a significant portion of its range. Listing a species as an endangered or threatened species can only be completed by issuing a rule. On June 20, 2013 (78 FR 37363; 78 FR 37328), we proposed to list the New Mexico meadow jumping mouse under the Act as an endangered species and proposed to designate critical habitat. We found that the species currently faces numerous threats of high magnitude, and, therefore, qualifies for listing, and we requested additional information and comments on the proposed listing. This final rule considers all comments received by peer reviewers, tribes, State agencies, Federal agencies, and the public regarding the proposed rule to list the New Mexico meadow jumping mouse.

This rule will finalize the listing of the New Mexico meadow jumping mouse as endangered.

The basis for our action. Under the Act, a species may be determined to be an endangered or threatened species based on any of five factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; and (E) other natural or manmade factors affecting its continued existence. We have determined that the New Mexico meadow jumping mouse meets the definition of an endangered species primarily because of the present or threatened destruction, modification, or curtailment of its habitat or range; the inadequacy of existing regulatory mechanisms; and other natural and manmade factors affecting its continued existence. Our consideration of these factors is described in section 5.1 "Habitat Loss" and section 5.3
